**Managing Tourism and Hospitality Services** Mar 31 2021 The aim of this book is to enhance theoretical and practical understanding of quality management in tourism and hospitality. It provides a benchmark of current knowledge, and examines the range of research methods being applied to further develop tourism and hospitality service management research. It is hoped that this book will stimulate new research questions by highlighting tensions and challenges in the area.

**Digital Business** Aug 24 2020 This volume contains the proceedings of the First International ICST Conference on Digital Business (DigiBiz 2009), hosted by City University London in London, UK. This annual event had the main objective to stimulate and disseminate research results and experimentation on future Digital Business to a wider multidisciplinary forum that would allow the participants to cross the boundaries between research and business. The scientific offering in e-business, e-commerce, and ICT in general is quite broad and spans many different research themes, involving several communities and methodologies. The growth and dynamic nature of these research themes pose both challenges and opportunities. The challenges are in having scientists and practitioners talk to each other: despite the fact that they work on similar problems they often use very different languages in terms of research tools and approaches. The opportunities on the other hand arise when scientists and practitioners engage in multidisciplinary discussions leading to new ideas, projects and products.

**Pervasive Computing** Apr 12 2022 This book describes a new class of computing devices which are becoming omnipresent in every day life. They make information access and processing easily available for everyone from anywhere at any time. Mobility, wireless connectivity, diversity, and ease-of-use are the magic keywords of Pervasive and Ubiquitous Computing. The book covers these front-end devices as well as their operating systems and the back-end infrastructure which integrate these pervasive components into a seamless IT world. A strong emphasis is placed on the underlying technologies and standards applied when building up pervasive solutions. These fundamental topics include commonly used terms such as XML, WAP, UMTS, GPRS, Bluetooth, Jini, transcoding, and cryptography, to mention just a few. Voice, Web Application Servers, Portals, Web Services, and Synchronized and Device Management are new in the second edition. Besides a comprehensive state-of-the-art description of the Pervasive Computing technology itself, this book gives an overview of today's real-life applications and accompanying service offerings. M-Commerce, e-Business, networked home, travel, and finance are exciting examples of applied Ubiquitous Computing.

**Technical, Economic and Societal Effects of Manufacturing 4.0** Oct 06 2021 This open access book is among the first cross-disciplinary works about Manufacturing 4.0. It includes chapters about the technical, the economic, and the social aspects of this important phenomenon. Together the material presented allows the reader to develop a holistic picture of where the manufacturing industry and the parts of the society that depend on it may be going in the future. Manufacturing 4.0 is not only a technical change, nor is it a purely technically driven change, but it is a societal change that has the potential to disrupt the way societies are constructed both in the positive and in the negative. This book will be of interest to scholars researching manufacturing, technological innovation, innovation management and industry 4.0.

**Intelligence in Services and Networks. Paving the Way for an Open Service Market** Jun 14 2022 Paving the Way for an Open Service Market We live in an age when powerful communications technology is becoming available to everyone. From our home we can send and receive not only analogue voice, but also growing volumes of digital information and even intelligence in the form of agents. We are becoming increasingly mobile and are expecting the same level of connectivity in the home, in the office, and on the road. The regulatory and commercial environment in which we communicate is changing. The telecommunications market is becoming increasingly competitive. The Internet is erasing the borders between information technology and telecommunications. And the way we do business is ever more dominated by electronic exchanges of information. Is our technology ready for the open market of networks and services? Can we manage the growing complexity of computing and telecommunications technology and place it at the service of the people? The challenge for the research community is to develop the tools and techniques that will ultimately bring the full power of communications and information to everyone, in a way that everyone can easily use. The Sixth International Conference on Intelligence in Services and Networks (IS&N'99) is all about technology for paving the way to the open services market. Since the first IS&N conference in 1992 the focus of the IS&N program has continually shifted. We see existing technologies maturing while new ones emerge, but the bottom line has always been putting technology at the service of the people.

**Labor Rights Violation in Global Supply Chains** Jun 02 2021 Der Autor wählt einen Multi-Stakeholder-Ansatz, um das Thema Arbeitsrechte in globalen Lieferketten zu untersuchen. Er analysiert potenzielle Ursachen für die Verletzung von Arbeitsrechten und schlägt dann einen neuartigen, partizipatorischen arbeitnehmerseitigen Ansatz zur Messung dieser Arbeitsrechtsverletzungen vor. Anschließend wird anhand von drei Fallstudien aus China, Bangladesch und Jordanien diskutiert, wie ArbeiterInnen und deren RepräsentantInnen die Verletzung von Rechten in einem kompetitiven Umfeld beseitigen und die Rechte von ArbeiterInnen und ArbeitnehmerInnen stärken können.

**Dismantling the Dream Factory** Nov 19 2022 The history of postwar German cinema has most often been told as a story of failure, a failure paradoxically epitomized by the remarkable popularity of film throughout the late 1940s and 1950s. Through the analysis of 10 representative films, Hester Baer reassesses this period, looking in particular at how the attempt to “dismantle the dream factory” of Nazi entertainment cinema resulted in a new cinematic language which developed as a result of the changing audience demographic. In an era when female viewers comprised 70 percent of cinema audiences a “women's cinema” emerged, which sought to appeal to female spectators through its genres, star choices, stories, and formal conventions. In addition to analyzing the formal language and narrative content of these films, Baer uses a wide array of other sources to reconstruct the original context of their reception, including promotional and publicity materials, film programs, censorship documents, reviews, and spreads in fan magazines. This is a fascinating, impeccably researched and penetrating analysis of an essential period which saw the rebirth of German cinema after its thorough delegitimization under the Nazi regime.

**An Introduction to Operations Management** Jan 21 2023 An Introduction to Operations Management: The Joy of Operations covers the core topics of operations management, including product and service design, processes, capacity planning, forecasting, inventory, quality, supply chain management, and project management. Das provides a clear, connected, and current view of operations management and how it relates to a firm's strategic goals. Students will benefit from the real-world scenarios that foster an understanding of operations management tasks. Without relying heavily on statistics and mathematical derivations, the book offers applied models and a simple, predictable chapter format to make it easy to navigate. Students of introductory operations management courses will love this practical textbook. A companion website features an instructor's manual with test questions, as well as additional exercises and examples for in-class use.

**Operations Research and Management Science Handbook** May 21 2020 Operations Research (OR) began as an interdisciplinary activity to solve complex military problems during World War II. Utilizing principles from mathematics, engineering, business, computer science, economics, and statistics, OR has developed into a full fledged academic discipline with practical application in business, industry, government and military. Currently regarded as a body of established mathematical models and methods essential to solving complicated management issues, OR provides quantitative analysis of problems from which managers can make objective decisions. Operations Research and Management Science (OR/MS) methodologies continue to flourish in numerous decision making fields. Featuring a mix of international authors, Operations Research and Management Science Handbook combines OR/MS models, methods, and applications into one comprehensive, yet concise volume. The first resource to reach for when confronting OR/MS difficulties, this text – Provides a single source guide in OR/MS Bridges theory and practice Covers all topics relevant to OR/MS Offers a quick reference guide for students, researchers and practitioners Contains unified and up-to-date coverage designed and edited with non-experts in mind Discusses software availability for all OR/MS techniques Includes contributions from a mix of domestic and international experts The 26 chapters in the handbook are divided into two parts. Part I contains 14 chapters that cover the fundamental OR/MS models and methods. Each chapter gives an overview of a particular OR/MS model, its solution methods and illustrates successful applications. Part II of the handbook contains 11 chapters discussing the OR/MS applications in specific areas. They include airlines, e-commerce, energy systems, finance, military, production systems, project management, quality control, reliability, supply chain management and water resources. Part II ends with a chapter on the future of OR/MS applications.

**Manufacturing Facilities Design and Material Handling** Jul 03 2021 Designed for junior- and senior-level courses in Plant and Facilities Planning and Manufacturing Systems and Procedures, this textbook is also suitable for graduate-level and two-year college courses. The book takes a practical, hands-on, project-oriented approach to exploring the techniques and procedures for developing an efficient facility layout. It also introduces state-of-the-art tools including computer simulation. Access to Layout-iQ workspace planning software is included for purchasers of the book. Theoretical concepts are clearly explained and then rapidly applied to a practical setting through a detailed case study at the end of the volume. The book systematically leads students through the collection, analysis, and development of information to produce a quality functional plant layout for a lean manufacturing environment. All aspects of facility design, from receiving to shipping, are covered. In the fifth edition of this successful book, previously published by Prentice Hall, numerous updates and corrections have been made. Also, rather than including brief “case-in-point” examples at the end of each chapter, a single, detailed case study is provided that better exposes students to the multiple considerations that need to be taken into account when improving efficiency in a real manufacturing facility. The textbook has enjoyed substantial international adoptions and has been translated into Spanish and Chinese. This replaces the 4th Edition by Prentice Hall (ISBN# 978-0135001059).

The papers address the entire range of current topics in grid computing from computational and data grids to the semantic grid and grid application in various fields.

**The Routledge Handbook of Service Research Insights and Ideas** Aug 16 2022 The Routledge Handbook of Service Research Insights and Ideas offers authoritative coverage of current scholarship in the expanding discipline of service research. Original chapters from the world's leading specialists in the discipline explore foundations and innovations in services, highlighting important issues relating to service providers, customers, and service design. The volume goes beyond previous publications by drawing together material from different functional areas, including marketing, human resource management, and service process

design and operations. These topics are important in helping readers become knowledgeable about how different functional areas interact to create a successful customer experience. This book is ideal as a first port of call for postgraduate students desiring to get up to speed quickly in the services discipline. It is also a must-read for academics new to services who want to access cutting-edge research.
