New York Times Bestseller A Summer Reading Pick for President Barack Obama, Bill Gates, and Mark Zuckerberg From a renowned historian comes a groundbreaking narrative of humanity's creation and evolution—a #1 international bestseller—that explores the ways in which biology and history have defined us and enhanced our understanding of what it means to be “human.” One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others? And what may happen to us? Most books about the history of humanity pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold with this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, Sapiens integrates history and science to reconsider accepted narratives, connect past developments with contemporary concerns, and examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have governed life for the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27 photographs, 6 maps, and 25 illustrations/diagrams, this provocative and insightful work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley, Robert Wright, and Sharon Moalem. Sixteen-year-old Thomas wakes up with no memory in the middle of a maze and realizes he must work with the community in which he finds himself if he is to escape. The official book on the Rust programming language, written by the Rust development team at the Mozilla Foundation, fully updated for Rust 2018. The Rust Programming Language is the official book on Rust: an open source systems programming language that helps you write faster, more reliable software. Rust offers control over low-level details (such as memory usage) in combination with high-level ergonomics, eliminating the hassle traditionally associated with low-level languages. The authors of The Rust Programming Language, members of the Rust Core Team, share their knowledge and experience to show you how to take full advantage of Rust's features—from installation to creating robust and scalable programs. You'll begin with basics like creating functions, choosing data types, and binding variables and then move on to more advanced concepts, such as:

- Ownership and borrowing, lifetimes, and traits
- Using Rust's memory safety guarantees to build fast, safe programs
- Testing, error handling, and effective refactoring
- Generics, smart pointers, multithreading, trait objects, and advanced pattern matching
- Using Cargo, Rust's built-in package manager, to build, test, and document your code and manage dependencies
- How best to use Rust's advanced compiler with compiler-led programming techniques

You'll find plenty of code examples throughout the book, as well as three chapters dedicated to building complete projects to test your learning: a number guessing game, a Rust implementation of a command line tool, and a multithreaded server. New to this edition: An extended section on Rust macros, an expanded chapter on modules, and appendixes on Rust development tools and editions. This book presents a citizen-centric perspective of the dual components of e-government and e-governance. Charlie Reade looks like a regular high school kid, great at baseball and football, a decent student. But he carries a heavy load. His mom was killed in a hit-and-run accident when he was ten, and grief drove his dad to drink. Charlie learned how to take care of himself - and his dad. Then, when Charlie is seventeen, he meets a dog named Radar and her aging master, Howard Bowditch, a recluse in a big house at the top of a big hill, with a locked shed in the backyard. Sometimes strange sounds emerge from it. Charlie starts doing jobs for Mr. Bowditch and loses his heart to Radar. Then, when Bowditch dies, he leaves Charlie a cassette tape telling a story no one would believe. What Bowditch knows, and has kept secret all his long life, is that inside the shed is a portal to another world. King's storytelling in Fairy Tale soars. This is a magnificent and terrifying tale about another world than ours, in which good is pitted against overwhelming evil, and a heroic boy - and his dog - must lead the battle. Official Tourism Websites: A Discourse Analysis Perspective investigates the construction and promotion of identity of tourist locales by the designers of the official websites for destinations such as Santiago de Compostela, Spain; the Baltic states of Latvia and Estonia; New Orleans, Louisiana and Gary, Indiana; Myanmar/Burma; US Sports Halls of Fame; and, in recognizing the influence and popularity of such sites, three websites parodying the imaginary nations of Phaic Tan, Molvania, and San Sombrero. Analysis addresses how tourism websites foster social action and, therefore, contribute to the (re)construction of nations and other communities by variably fostering re-imagination, rebirth, renaissance, promotion and caution, and patriotism. Recognizing that tourism texts can function to both construct and embody identity for their respective locales, this investigation employs critical discourse analysis, multimodal discourse analysis, and visual semiotic analysis in the investigation of web texts and images. A Face in the Crowd by Stephen King and Stewart O'Nan (FIRST TIME IN PRINT!) Dean Evers, an elderly widower, sits in front of the television with nothing better to do than waste his leftover evenings watching baseball. It's Rays/Mariners, and David Price is breezing through the line-up. Suddenly, in a seat a few rows up beyond the batter, Evers sees the face of someone from decades past, someone who shouldn't be at the ballgame, shouldn't be on the planet. And so begins a parade of people from Evers's past, all of them occupying that seat behind home plate. Until one day Dean Evers sees someone even eerier... The Longest December by Richard Chizmar (EXPANDED VERSION!) Bob and Katy Howard are a typical middle-aged couple living the good life in the suburbs. They're happily married, have successful careers, and a grown son starting college. Their recently widowed next-door neighbor, James Wilkinson, is practically a member of the Howard family. When police show up at the Howard's doorstep one snowy December morning with the news that they have been investigating Wilkinson for a series of violent crimes, Bob and Katy are left in shock and disbelief. The elderly James Wilkinson they know and love is kind and gentle. He shared their Thanksgiving table just a couple weeks earlier. He couldn't possibly be responsible for the gruesome deeds of which he's being accused. Or could he? The Longest December (a revised and expanded version of Chizmar's acclaimed novella, A Long December) is a cat-and-mouse, Hitchcockian thriller that will shock you with its brutal twists and turns while also breaking your heart. Stephen King calls it ...a really terrific piece of work. I couldn't put it down. Chizmar played his cards with great craft. I'm an old hand at this, but I kept chasing the red herrings. If your

Now, based on new research conducted with leaders, change makers, and culture shifters, she's showing us how to put those ideas into practice so we can step up and lead. Don't miss the five-part HBO Max docuseries Brené Brown: Atlas of the Heart! NAMED ONE OF THE BEST BOOKS OF THE YEAR BY

BLOOMBERG Leadership is not about titles, status, and wielding power. A leader is anyone who takes responsibility for recognizing the potential in people and ideas, and has the courage to develop that potential. When we dare to lead, we don't pretend to have the right answers; we stay curious and ask the right questions. We don't see power as finite and hoard it; we know that power becomes infinite when we share it with others. We don't avoid difficult conversations and situations; we lean into vulnerability when it's necessary to do good work. But daring leadership in a culture defined by scarcity, fear, and uncertainty requires skill-building around traits that are deeply and uniquely human. The irony is that we're choosing not to invest in developing the hearts and minds of leaders at the exact same time as we're scrambling to figure out what we have to offer that machines and AI can't do better and faster. What can we do better? Empathy, connection, and courage, to start. Four-time #1 New York Times bestselling author Brené Brown has spent the past two decades studying the emotions and experiences that give meaning to our lives, and the past seven years working with transformative leaders and teams spanning the globe. She found that leaders in organizations ranging from small entrepreneurial startups and family-owned businesses to nonprofits, civic organizations, and Fortune 50 companies all ask the same question: How do you cultivate braver, more daring leaders, and how do you embed the value of courage in your culture? In this new book, Brown uses research, stories, and examples to answer these questions in the no-BS style that millions of readers have come to expect and love. Brown writes, "One of the most important findings of my career is that daring leadership is a collection of four skill sets that are 100 percent teachable, observable, and measurable. It's learning and unlearning that requires brave work, tough conversations, and showing up with your whole heart. Easy? No. Because choosing courage over comfort is not always our default. Worth it? Always. We want to be brave with our lives and our work. It's why we're here." Whether you've read Daring Greatly and Rising Strong or you're new to Brené Brown's work, this book is for anyone who wants to step up and into brave leadership.
