Recognized as the leading text on arbitration, Carbonneau's *Cases and Materials* reflects years of teaching arbitration at U.S. law schools and international law faculties, like McGill and Queen Mary College, London. The volume is a pioneering work. The Fourth Edition represents a complete make-over; it is clear, straightforward, and analytical. Coverage is comprehensive and cutting-edge: from the validity of agreements and awards to opt-in provisions, the action to clarify awards, and penalties for frivolous vacatur petitions. All forms of arbitration are treated. The materials explain basic concepts and emphasize the significance of contract freedom, arbitrability, and federal preemption. Description Coming Soon! A contemporary, easy-to-teach text by high-profile authors, this casebook invites students and teachers to re-imagine the field of Insurance Law. The authors demonstrates the big-picture role of insurance law and policy in American business and society, exploring federal-state regulatory roles in depth as well as the traditional topics covered in casebooks. *Insurance Law and Policy: Cases and Materials* uses more statutory material than any other casebook, with statutes typically presented through problems. Manageable assignments contain one major case followed by informative notes, questions and a problem. This concise casebook offers materials that are thorough yet brief, enabling coverage of all the major topics in a three- or four-credit format. The emphasis is decidedly on primary materials: well-edited principal cases,

followed by notes that inform the student on important details and developments. Each chapter covers an article of the Federal Rules of Evidence. Within the chapters and sections, the materials generally follow the sequence of the Rules. The 8th edition covers all important recent developments, including federal and state court decisions interpreting the Rules, the Supreme Court's decision in *Peña-Rodriguez v. Colorado* (2017), and recent state developments concerning prior offenses in sex crime cases. With this new edition, *Administrative Law: Cases and Materials* continues to present the complex substance of administrative law in a format that is both intellectually satisfying and easily understandable. Prior to publication the book was used at the University of Minnesota where the students found administrative law to be both an exciting and rewarding endeavor. In addition to carefully examining current law, students will become familiar with the relevant historical perspectives so necessary to appreciate the dynamics of today's law. They will become familiar with the so-called progressive movement and its regulatory offspring, the independent agency, with the New Deal regulatory agenda, with the post-World War II consensus embodying the Administrative Procedure Act, with the problem of capture, with aggressive modes of judicial review in response, with the problem ossification of rule-making, and with an array of judicial reinterpretations of settled precedents. This focus on doctrinal coherence and historical background provides a rich intellectual experience. This new Second Edition also: Includes new cases through 2010 Term of the Supreme Court, including *Free Enterprise Fund v. Public Company Accounting Oversight Board*, the latest separation-of-powers decision by the U.S. Supreme Court, and last year's *FCC v. Fox Telev. Stations, Inc.* gloss on hard-look judicial review; Focuses upon the relationships among various administrative law doctrines, such as the relation between the substantial-evidence and arbitrary-and-capricious review standards and the relations between those review standards and the Chevron/Skidmore deference standards; and Examines split-enforcement agencies such as OSHA establishes as well as analogous structures in the benefit agencies in addition to omnipresent unitary regulatory agency. This book also is available in an alternative loose-leaf version printed on 8.5 x 11 inch paper with wider margins and with the same pagination as the hardbound book. The Hellerstein casebook, now authored by four leading experts in the field, provides a comprehensive overview of the field of state and local taxation (SALT), reflecting the most recent developments in this rapidly changing field. The book weaves together two structural approaches to SALT -- i.e., by constitutional doctrine (e.g., due process, interstate commerce, equal protection) and by type of tax (individual income, corporate income, sales/use, property). This analytical structure is designed to give students an in-depth understanding of both the fiscal architecture of SALT and the major constitutional limits on subnational taxing power. This text draws together in one volume an exhaustive selection of cases, materials and background information on public international law, supplemented by expert commentary and analysis. This sixth edition has been completely revised to incorporate major developments in the subject, including the expansion of human rights issues. The Tenth Edition provides up-to-date treatment of climate change issues across different statutes. This classic casebook provides students with a thorough understanding of all major environmental regulatory schemes as well as insight into current policy controversies.

The book pays particular attention to the dynamics involved in the creation and implementation of environmental law, focusing on interest group challenges, the proper role of agencies in implementing complex statutes and the involvement of courts in determining how deferential to be to agency implementation. The book covers the latest appellate and Supreme Court cases involving interstate air pollution, climate change, wetlands and takings, as well as major recent regulatory changes. This edition provides revised treatment of the toxics materials to reflect recent legislative changes, and other chapters reflect important decisions such as UARG. Full attention is given to Obama Administrative initiatives and current efforts by the Trump Administration to roll them back. "The strengths of this book have always been in its insight into the origins of the evidence rules, which was a particular strength of its original authors Edward W. Cleary and John W. Strong. The new authors have built upon that strength at the same time we strive to give attention to contemporary issues in evidence law". -- INTRODUCTION.

This text, the only criminal law casebook authored by two progressive female law professors of color, provides the reader with both critical race and critical feminist theory perspectives on criminal law. The book focuses on the cultural context of substantive criminal law, integrating issues of race, gender, class, and sexual orientation where relevant. The Tenth Edition provides up-to-date treatment of climate change issues across different statutes. This classic casebook provides students with a thorough understanding of all major environmental regulatory schemes as well as insight into current policy controversies. The book pays particular attention to the dynamics involved in the creation and implementation of environmental law, focusing on interest group challenges, the proper role of agencies in implementing complex statutes and the involvement of courts in determining how deferential to be to agency implementation. The book covers the latest appellate and Supreme Court cases involving interstate air pollution, climate change, wetlands and takings, as well as major recent regulatory changes. This edition provides revised treatment of the toxics materials to reflect recent legislative changes, and other chapters reflect important decisions such as UARG. Full attention is given to Obama Administrative initiatives and current efforts by the Trump Administration to roll them back. Cases and Materials on Criminal Law provides a comprehensive selection of key materials drawn from law reports, legislation, Law Commission consultation papers and reports, and Home Office publications. Clear and highly accessible, this volume is presented in a coherent structure and provides full coverage of the topics commonly found in the criminal law syllabus. The range of thoughtfully selected materials and authoritative commentary ensures that this book provides an essential collection of materials and analysis to stimulate the reader and assist in the study of this difficult and challenging area of law. New features include: revised text design with clear page layout, headings and boxed and shaded sections to aid navigation and readability chapter introductions to highlight the salient features under discussion short chapter table of contents to enable easier navigation "Comments and Questions" sections to encourage students to reflect on their reading expanded further reading to encourage students to engage further with the subject a Companion Website to provide regular updates to the book. Recent decisions of note that are extracted and analysed include R v Kennedy (manslaughter based on supply of heroin); Attorney General for Jersey v Holley

(provocation); *R v Mark* and *R v Willoughby* (elements of killing by gross negligence); *R v Barnes* (consent as a defence to sporting injuries); Attorney General's Reference (No 3 of 2004) (accessorial liability) and *R v Hatton* (intoxicated mistake in self defence cases). Consideration is also given to the likely changes to the law relating to corporate manslaughter, at the time of writing contained in the Corporate Manslaughter and Corporate Homicide Bill currently before Parliament. Two major law reform publications are extensively extracted and contextualised in this 4th edition - the Law Commission's report on Murder, Manslaughter and Infanticide (Law Com No 304) and the Law Commission's Report on Inchoate Liability for Assisting and Encouraging Crime (Law Com No 300). This book is an invaluable reference for students on undergraduate or CPE/PG Diploma in Law criminal law courses, particularly those studying independently or on distance learning programmes. This popular casebook, through the selection of classic and modern cases, provides an excellent tool for teaching students the common law foundations of the criminal law and modern statutory reform, including the Model Penal Code. Along the way, the casebook considers modern controversies (e.g., "shaming" punishment, rape law, self-defense by battered women, euthanasia, the role of culture in determining culpability), and creatively uses literature (e.g., examining insanity through Edgar Allen Poe's *The-Tell Tale Heart*) and even "brain teasers" to confront (as the Preface states) "the Big Questions . . . that philosophers, theologians, scientists, and poets, as well as lawyers, have grappled with for centuries." Professor Stephen Garvey (Cornell) joins the casebook beginning with this new edition. The Sixth Edition, as in the past, includes some new cases, as well as updates in the notes that bring current issues of criminal law to the fore. The new 5th edition retains the statute-based focus of the original, guiding students through the rules, doctrines, and theories that apply to major litigation under the three generations of primary civil rights statutes (the original statutes, sections 1983, 1981, 1982, and 1985(3), with their emphasis on constitutional litigation; the revolutionary statutes of the 1960's and early 1970's, Title VII, Title VI, the Voting Rights Act, and section 504), and the evolutionary enactments after 1990 (the Americans with Disabilities Act, the Civil Rights Amendments of 1991, and the judicially-limited Violence Against Women Act). The 5th edition continues an emphasis begun in the 4th edition on legal realism and how the statutes respond to or fail to ameliorate real-life problems. The combination of statutory coverage and legal realism allows each professor to choose the topical areas and political viewpoints that he or she wishes to emphasize. In addition to widespread general updating, the new 5th edition significantly expands on prior editions with a new focus on Fourth Amendment litigation post-*Scott*, several new approaches both substantive and procedural -- to official immunity defenses, and new cases relating to the increasingly fractured sovereign immunity defense. In addition, a significant new sub-section explores the Supreme Court's attempt in the *Ricci* case to adjust the relation between disparate impact and disparate treatment analyses, highlighting its substantial impact on affirmative action concepts as well. Finally, the new 5th edition also covers the 2008 Amendments to the Americans With Disabilities Act and their significant alteration of the Court's previous attempts to restrict disability litigation. The new edition will also include any new decisions anticipated thro Description Coming Soon! A practical approach to Corporations featuring carefully edited cases, intriguing

notes and questions, and exercises drawn from actual cases to create a practical and skills-driven approach to the study of the legal principles of business. Featuring: Each chapter includes all the landmark cases that students should be introduced to in a Corporations or Business Entities course Strong skills-driven exercises and questions (both litigation-based and transaction-based) the practical exercises give students a chance to simulate what lawyers do the exercises are drawn from actual disputes, particularly from material in the case's procedural history, publicly-available information about the dispute, and other information provided from the actual lawyers on the case Brief notes and questions after cases, including some with practice-orientation Diagrams, or Roadmaps are included to give students an illustrative snapshot of some of the toughest cases. This text obviates the need for law professors interested in skills training to rely on supplemental texts or creating their own materials Companion website that includes supplemental introductory cases (with notes and questions) to enable use of the casebook by MBA and undergraduate students Hardbound - New, hardbound print book. This book is designed to introduce students to broad topics in sports law, rather than just focusing on sports agency. Sports agency comprises only a small portion of sports law-so students will benefit greatly from learning about sports law with a broader perspective. Military Justice: Cases and Materials gives teachers a new and powerful tool to introduce students to military law while deepening their understanding of criminal law and procedure, comparative law, international law, and constitutional law. At a time when the tempo of military operations around the world seems to increase constantly and high-profile courts-martial dominate the headlines, this book gives students and teachers unprecedented the tools needed to analyze, understand, and evaluate worldwide military justice. With prosecutions arising from prisoner abuse, atrocities against civilians, and servicemembers' opposition to ongoing wars, the military justice system now has a prominence unmatched since the Vietnam era. This higher profile for courts-martial, combined with the difficult and fundamental legal issues raised by the military commissions, suggests that military courses will now be in great demand. This casebook provides the text for such a course. Its coverage of the U.S. court-martial and other systems of military criminal law provides a framework through which students can explore the role and operation of military justice within a democratic society. In an era of worldwide deployments, multi-national operations, and global terrorism, this book illuminates the interconnectedness of military justice systems through a far-ranging collection of judicial opinions, statutes, regulations, commentaries, and scholarship. While the materials presented draw heavily from the United States, most chapters also present materials from other jurisdictions to enhance students' appreciation of both the unique American experience and the availability of alternative approaches to military discipline, accountability, and punishment. International norms are also examined. Part I, Foundations, sets the stage by exploring the origins and purposes of military justice, pointing out the many sources of law that govern this area, analyzing the unique and critical role of the commander in military justice, and assessing professional responsibility rules for military lawyers. Part II, Principles, steps further into legal analysis to study the jurisdiction of military courts, identify crimes and defenses that apply only in a military context, and analyze the extent to which the obligations of

military service alter the protection of fundamental rights. Part III, Trials, brings students into the court-martial to meet military judges, juries, and counsel and to study the rules of procedure, evidence, sentencing, and appeal. Part IV, Special Contexts, takes a broader approach to assess the challenges that a military justice system faces during combat and peacekeeping operations. This part also looks at the topic of military commissions. Part V, The Future, gives students a glimpse into the changes that lie ahead by focusing on the processes of legal reform and globalization. "This federal Indian law casebook has an unprecedented focus on Native nation-building, including cutting-edge materials on tribal economies and tribal justice systems unavailable elsewhere. The seventh edition retains classic material on the history of federal Indian law and policy, including the medieval origins of the "doctrine of discovery," and the shifting eras of Indian law leading to the current nation-building era. The book covers the federal tribal relationship; tribal sovereignty and jurisdiction; Indian religion and culture; water rights; treaty rights; rights of Alaska natives and native Hawaiians; and international legal perspectives"--Publisher's website. An array of carefully selected case report and academic article extracts combined with author commentary to provide a thorough and engaging assessment of criminal law provisions. Updated with an emphasis on current issues, this classic casebook emphasizes developments in international law, with expertly edited cases and problems for class discussion. Cases and Materials on International Law offers a treatment of the subject for introductory and advanced classes and detailed readings and reference materials for those who wish to pursue topics in depth. The fourth edition enriches every chapter with new information on institutions contributing to the sources and enforcement of international law, including the World Trade Organization, the International Criminal Tribunals for Yugoslavia and Rwanda, the prospective International Criminal Court, and organizations in the fields of law of the sea and arms control. International criminal law now has a chapter of its own, and the casebook gives expanded treatment to human rights, environmental law, and economic law. Hardbound - New, hardbound print book. Tracing the development of contract law in the English and American common law traditions, Contracts features authoritative discussions and notes and focuses on significant cases. The casebook also provides opportunities for teachers to put before students the ethical responsibilities of attorneys and the consequences of neglecting such responsibilities. Highlights of the seventh edition include: Revised selections with more Restatement and a special section providing leading cases Modest updating with new cases to refresh the book in response to adopters' expressed preferences More sophisticated but still accessible textual material on the economics of contract law Revised introduction to provide for smoother transition into materials on damages Changes in the New Edition Include: Chapter 1: Bases for Enforcing Promises. In an engaging new beginning, the chapter now starts with two cases that explore the meaning of promise. The cases are the old The Ninth Edition of Securities Regulation: Cases and Materials brings onboard two new co-authors—Ann Lipton and William Sjoström—to a casebook that has long set the standard for providing students with an in-depth, sophisticated, practical look at contemporary securities law. As it has since its first edition, Securities Regulation: Cases and Materials contains a very teachable mix of problems, cases, and textual material, encouraging students to build their knowledge base

by being active problem-solvers. Always forward-thinking, stressing current developments and controversies, the book is also highly modular, so that professors can easily pick and choose how to structure their courses without being locked into any given progression. New to the Ninth Edition: Coverage of "cryptocurrencies" and coin offerings Commentary on market developments such as indexing and algorithmic trading A tighter set of problems and materials on gun-jumping under Section 5 The SEC's latest reforms of Regulation D and the intrastate offering exemption Spotify and the trend toward direct listings as a way of going public Coverage of Supreme Court decisions from the last three years, including *Lorenzo*, *Salman*, *Cyan*, *Lucia*, and *Kokesh*, as well as important lower court cases The SEC broker-dealer proposal (and perhaps adoption) of Regulation Best Interest Professors and students will benefit from: The book's highly modular organization, enabling different teaching formats and coverage Concise notes that introduce the reader to both theory and real-life practice issues A book that is always up to date and on the cutting edge Hardbound - New, hardbound print book. Premised on the belief that criminal law is an exciting subject to learn and teach, this popular casebook provides a balanced and creative overview of classic and modern criminal law cases and issues while covering both common law foundations and modern statutory reform, including the Model Penal Code. The casebook invites classroom consideration of many controversies in the field (e.g., rape law, race-based jury nullification, Internet crime, and anti-stalking legislation) and defenses (e.g., battered women's self-defense). Using imaginative examples from literature and music to illustrate criminal law issues (e.g., examining insanity with Edgar Allan Poe's *The Tell-Tale Heart* and homicide with Willa Cather's *O Pioneers!*), the casebook allows law students to confront some of the Big Questions with which philosophers, theologians, scientists, poets, and lawyers have grappled for centuries. Rev. ed. of: *Cases and materials on equitable remedies, restitution, and damages* / by Robert N. Leavell. ... [et al.]. 7th ed. c2005. *Property: Cases and Materials* features sweeping coverage in a single volume, from "old property" (such as the basics of estates in land and servitudes) to "new property," including intellectual property, cultural property, and property in living things. The text provokes debate on fundamental questions such as the creation of property, information as property, collective vs. individual rights, and property as related to other bodies of law. Its coverage of intellectual property shows how the law grows and responds to social and technological change. Designed for flexibility, stand-alone chapters can be omitted if time constraints require. *Property: Cases and Materials* includes appellate decisions, statutes, regulations, administrative decisions, law review articles, and non-legal materials. Principal cases include *Elvis Presley International Memorial Foundation v. Crowell*, *Popov v. Hayashi* (Barry Bonds home run ball); *People v. Chubbs* (software for DNA matching), and *Dred Scott v. Sandford*. Key Features: Updated with more recent cases, including more cases from the twenty-first century than any other major property casebook. Improved coverage of natural resources law and intellectual property. Thorough update of all existing materials. This classic international law casebook is updated to cover recent case law, including the International Court of Justice's Certain Activities carried out by Nicaragua in the Border Area (*Costa Rica v. Nicaragua*) case, the arbitral decision in the South China Sea (*Philippines v. China*), and the U.S. Supreme

Court's ruling in *Jesner v. Arab Bank*. With extraordinary range and depth, this casebook probes "hot topics" such as cyber-attacks, the Paris Agreement on climate change, the International Criminal Court's possible investigation into war crimes in Afghanistan, and complaints of racial discrimination by Palestine against Israel and by Qatar against the United Arab Emirates, all calculated to provoke engaging classroom discussions. This casebook is designed for introductory and advanced classes. This teachable casebook provides an introduction to the law and policy of modern communications. The book is organized by analytic concepts instead of current industry lines, which are constantly made out-of-date by technological convergence. The basic ideas--power, entry, pricing, access, classification, (indecent) content, privacy, and intermediary liability--equip students with a durable and yet flexible intellectual structure that can help parse a complex and ever-changing field. This book includes concise technological and legal summaries and carefully edited opinions and FCC reports. It also includes "just-in-time" delivery of the text of statutes and regulations so that students get accustomed to parsing statutory material as they analyze legal questions. In this seventh edition, we have simplified wherever possible and minimized technological detail and regulatory history that were slowing down readers without sufficient pedagogical payoff. We hope to have created a comprehensive, challenging, yet accessible text that will pay long-lasting educational dividends. More information is available at the casebook's website: <http://jerrykang.net/commlaw>. Comments are always welcome

The Ninth Edition provides up-to-date treatment of climate change issues across different statutes. This classic casebook provides students with a thorough understanding of all major environmental regulatory schemes as well as insight into current policy controversies. The book pays particular attention to the dynamics involved in the creation and implementation of environmental law, focusing on interest group challenges, the proper role of agencies in implementing complex statutes and the involvement of courts in determining how deferential to be to agency implementation. The book covers the latest appellate and Supreme Court cases involving interstate air pollution, climate change, wetlands and takings, as well as major recent regulatory changes. To order a paperback version of this casebook, please click [here](#). Florida Constitutional Law, a casebook used in Florida since 1992, is now in its fifth edition. Authors Cooper, Dunham and Woody include the functions of a state constitution and how the Florida constitution is amended; separation of power issues; the major constitutional limits on legislative power; the constitutional jurisdiction of Florida courts, as well as the separation of powers limits on the courts that resemble the Article III limits on federal judicial power; units of local government and their relationship to the state and each other; the major constitutional limitations on taxation and borrowing; a selected review of various provisions of the Declaration of Rights, including Florida's privacy guarantee (which is far more extensive than privacy under the United States Constitution); and Florida's homestead provision. The authors have made this edition more user friendly than the fourth edition and have created an accompanying teacher's manual. The 2013 Electronic Supplement to this text is available to adopters upon request. The supplement includes 14 practice problems, along with discussion points, that can be used to enhance student synthesis and legal analysis, as well as sample syllabi. If you have adopted the book for a course, contact

sarah.hornbach@cap-press.com to request the supplement. Please include in the email the school and name of the course for which you have adopted this book.
