The Human Cosmos Jan 2023 A Best Book of 2020 (NPR) A Best Book of 2020 (The Economist) A Top Ten

Best Science Book of 2020 (Smithsonian) A Best Science and Technology Book of 2020 (Library Journal) A Must-Read Book to Escape the Chaos of 2020 (Newsweek) Starred review (Booklist) Starred review (Publishers Weekly) A historically unprecedented disconnect between humanity and the heavens has opened. Jo Marchant's book can begin to heal it. For at least 20,000 years, we have led not just an earthly existence but a cosmic one. Celestial cycles drove every aspect of our daily lives. Our innate relationship with the stars shaped who we are—our art, religious beliefs, social status, scientific advances, and even our

biology. But over the last few centuries we have separated ourselves from the universe that surrounds us. It's a disconnect with a dire cost. Our relationship to the stars and planets has moved from one of awe, wonder and superstition to one where technology is king—the cosmos is now explored through data on our screens, not by the naked eye observing the natural world. Indeed, in most countries, modern light pollution obscures much of the night sky from view. Jo Marchant's spellbinding parade of the ways different cultures celebrated the majesty and mysteries of the night sky is a journey to the most awe-

inspiring view you can ever see: looking up on a clear dark night. That experience and the thoughts it has engendered have radically shaped human civilization across millennia. The cosmos is the source of our greatest creativity in art, in science, in life. To show us how, Jo Marchant takes us to the Hall of the Bulls in the caves at Lascaux in France, and to the summer solstice at a 5,000-year-old tomb at Newgrange, Ireland. We discover Chumash cosmology and visit medieval monks grappling with the nature of time and Tahitian sailors navigating by the stars. We discover how light reveals the chemical composition of the

sun, and we are with Einstein as he works out that space and time are one and the same. A four-billion-year-old meteor inspires a search for extraterrestrial life. The cosmically liberating, summary revelation is that star-gazing made us human.

Human Questions and Cosmic Answers Apr 30 2021
"The Human Pathway" Feb 26 2021 Jim Knut Larsson establishes that the foundation for freewill, meaning and purpose is anchored in the latest findings in quantum mechanics and cosmology-empowering us to create the future. The Human Pathway is destined to become the catalyst for a transformation in politics,

justice, government, economics and spiritualism. What choices does humanity need to make now, in order to avoid destruction? What goals can we set up to maximize meaning and purpose both for the individual and also for all of humanity? The Human Pathway might be the most important, inspiring and interesting book you will ever read. Our future depends upon your participation! Also included as an addendum: "What to do in case of arrest!" It could save your life or ... someone close to you! A must read! Some more questions ... What is "enlightenment"? Why the earth created humans? What would be the ultimate goals for

humanity? How can you unleash your creative powers and create your own future? Why every act, movement and thought is a manifestation of freewill and why it affects the evolution of the universe? Why the living standard in the US declines daily? Why there are more than 3 million people in jail and more than 50 million with a criminal record? People in America always talk about "they". "Back then, 'they' castrated people who were homosexuals. "They" had strict laws against sodomy." They" did radiation experiments on the population. The question is; who are "they"? Revelation: Does it matter if you are resurrected at some point in

the future? It is your desire to know the "truth" that drives your desire for resurrection. You will live forever as long as humanity-or if human intelligence lives on forever-because what is living, even if your ego is dead, is you being one with humanity. Individuals only manifest by their "clinging" to their egos. This "clinging" prevents you from becoming creative, happy and blissful. If you get rid of your ego, which should be everybody's goal, you will dedicate yourself to the eternal "now" and to serve humanity. A great quest is to help humanity reach its highest potential and to achieve "absolute" knowledge, "finish" the

creation of the universe and acquire the power to recreate everything that existed forever. Then, at that point, you will be resurrected! However there is a final revelation and, if it is revealed to you, it will give you "absolute" knowledge and peace. This final revelation is the logical conclusion of this book. Understand what is written and the truth will be revealed to you. When it is, you will understand that it cannot be directly communicated and understood by others unless they have the same revelation! You will know that you have the final knowledge when you get the revelation and you don't need to seek validation for it! However, you want to share it

with others! Study the revelations in this book and hopefully you will get it. You will know it when you do. We need to dismantle many laws and make society free again. We must get the government out of our lives. The benefit you get from reading my book is that you will be able to see through the myths. When you read my book, you will become an enlightened person. Actually after you read this book you will say, "I'm enlightened now". You will have revelations that will make you enjoy life more and become a happier person, but also you will no longer be seduced by propaganda. This, in the end, is a book of cosmic and spiritual enlightenment

and enlightenment with regard to politics, economics and justice. What does it mean to be an enlightened person who helps secure the future prosperity and excitement of living for yourself and for humanity as a whole? Another bonus from this book is that you may no longer fear death. You will become a participant in the conversation and the future goals and aspirations of humanity.

HUMAN AND COSMIC THOUGHT Feb 21 2023 Rudolf Steiner demonstrates that there are twelve main philosophical standpoints, and that the future of philosophy rests not upon defending one and refuting the others, but in

learning to experience the validity of them all. What convinces us of the truth of a certain point of view? Why do we find it difficult to comprehend viewpoints that differ from our own? What are the inner foundations of our knowledge? In these concentrated and aphoristic lectures, Steiner speaks of twelve main philosophical standpoints, and the importance of understanding each of them. An appreciation of the variety of possible world views not only sharpens and makes more flexible our own powers of thinking, but helps us to overcome a narrow-minded one-sidedness, promoting tolerance of other

people and their opinions. Steiner goes on to explain how each standpoint is also coloured by a particular 'soul mood', which influences the way we actively pursue knowledge. Several philosophers and their works are characterised in this manner, throwing light on their contributions to human culture. Through such insight into the true nature of human thinking, we are led to understand the quality of cosmic thought and how, in Rudolf Steiner's words, the human being can be seen as a 'thought which is thought by the Hierarchies of the cosmos'.

Human Agents of Cosmic Power in Hellenistic Judaism

and the Synoptic Tradition Nov 13 2019 The ancient world believed that the universe was made up of elements both material and spiritual. These elemental forces affected human life positively or negatively and any human being who could share their energy was a person of great significance - a human agent of cosmic power. This is a significant part of the background of the life and career of Jesus of Nazareth. The present work is a reappraisal of Synoptic accounts of Jesus and his followers in the light of recent developments in the study of ancient magic.

and Human Life Mar 10 2022 First published in 1945, in the aftermath of the bombing of Hiroshima and Nagasaki, this book offers a unique account of the problem of atomic energy and the underlying principles of radioactive decay. Written by the pre-eminent physicist George Gamow, it was designed to give a complete picture of atomic energy.

Human Purpose and Transhuman Potential Oct 25 2020 For millennia, great thinkers have contemplated the meaning and purpose of human existence; but while most assumed that humanity was the end point of creation or the pinnacle of evolution, Ted Chu makes the provocative claim

that the human race may in fact be a means rather than an end—that humankind will give rise to evolutionary successors. In this wide-ranging and authoritative work, Chu reexamines the question of human purpose in light of the extraordinary developments of science and technology. Arguing that a deep understanding of our place in the universe is required to navigate the magnitude of the choices that lie ahead, he surveys human wisdom from both East and West, traces the evolutionary trajectory that has led to this point, and explores the potentials emerging on the scientific frontier. The book addresses the legitimate fears

and concerns of “playing God” but embraces the possibility of transcending biological forms and becoming or creating entirely new life-forms. *Cosmic Influences on Humans, Animals, and Plants* Dec 07 2021 This annotated bibliography makes available to the general reader and scholar a broad survey of the scientific literature on alleged cosmic influences on humans, animals, and plants. To be included, a study must involve the collection of data or be a commentary on studies based on data. As some of the topics covered are still quite controversial in nature, while other topics have been scientifically studied to some

extent, the terms "alleged," "claimed" or "suggested" are noted in the citations to remind the reader that a particular study has not necessarily been proven to be scientifically valid. The four parts of *Cosmic Influences on Humans, Animals, and Plants* are organized around alleged effects of solar activity, the moon, the planets, and possible mechanisms for such actions. Some effects that the sun and moon are known to have on our daily lives, such as the cycles of light and dark and the lunar tides have not been included because of their commonality. However, other effects such as those influences the moon has been shown to have over some

animals have been included for the sake of completeness. With subject and author indexes.

Eternal and Transient

Elements in Human Life Dec

15 2019 In what has been referred to as 'the most advanced course in anthroposophy', Rudolf Steiner addresses one of the great

questions of our time: the role of evil in human development. He speaks of the year 666, when three time streams intersected - the familiar linear stream and two 'lateral' streams - and the reoccurrence of the 666-year rhythm in history. At the heart of this mystery is the being Sorat ('the beast'), who attempted to flood humanity with premature spiritual knowledge by inspiring the scholars of the ancient Academy of Gondishapur. Although responsible for the saving of Aristotle's works, Steiner describes how the Academy generated tremendous but dangerous gnostic wisdom, which eventually spread

through the Christian monasteries and inspired Western scientific thought. Its immediate negative impact, however, had to be counteracted by the Prophet Muhammad and the founding of Islam. In contrast to the 666-year rhythm in history, the 333-year rhythm is connected to the healing forces of the Mystery of Golgotha. The year 333 was a central point in the post-Atlantean age, but also a pivotal moment in establishing the Christ Impulse and the new equilibrium it brought to humanity, allowing people to gain wisdom through their own efforts. Such wisdom enables insight into three key areas: supersensible knowledge of

birth and death; understanding of an individual's life; and the ability consciously to confront the adversarial beings of Lucifer and Ahriman. Steiner addresses a host of additional themes, including occult Freemasonry in Anglo-American countries; materialism in the Roman Catholic Church; prophetic and apocalyptic vision; dualism and fatalism in pre-Christian times; and the delusion of time and space. Seeking to awaken his listeners to the urgency of the tasks ahead of them, he urges that spiritual understanding be enlivened with enthusiasm, fire and warmth of heart.

Cosmic and Human Metamorphosis Oct 17 2022
"As microcosms we are actually part of, and subject to, the same laws that cosmic beings

are, just as the breath we draw is subject to our own human nature.... If our hearts are sensitive to the secrets of cosmic existence and not merely blocks of wood, the words we have been placed into the universe will no longer be an abstract statement. We will be fully alive to this fact. Knowledge and a feeling will spring up within us, the fruits of which will be born in our will impulses, and our whole being will live in unison with the great life, divine cosmic existence." --Rudolf Steiner In this important series of lectures, Rudolf Steiner lays out for Society members right and wrong ways of establishing connections with those who

have died. Rather than following the materialistic desire to draw those who have died back into the physical realm, Steiner presents a means toward true spiritual union through strengthening one's forces of consciousness. He also showed how help is provided from the sphere of Christ's activity as a balance for our time. Steiner stated: "One who sees into the deeper meaning intended by our spiritual science recognizes in it not merely theoretical knowledge about all sorts of human problems, the members of the human being, reincarnation and karma, but one looks in it for an entirely different language, a way to

express oneself in regard to spiritual matters. The fact that we learn through spiritual science to speak inwardly in our thoughts with the spiritual world is far more important than acquiring theoretical ideas. The Christ is with us even until the end of the world. It is his language that we must learn." This book is a translation (translator unknown) of 7 lectures from *Bausteine zu einer Erkenntnis des Mysteriums von Golgatha. Kosmische und menschliche Metamorphose* ("Building Blocks for an Understanding of the Mystery of Golgotha: Cosmic and Human Metamorphoses") 17 lectures (GA 175).

Cosmic Consciousness Aug 15 2022
This classic study in the evolution of the human mind is a pioneering work as valuable today as when it was first published in 1901. At that time, it was enthusiastically acclaimed by both William James and P. D. Ouspensky. It has long been accepted as a landmark in the field of mysticism. In reviewing the mental and spiritual activity of

the human race, Dr. Bucke discovers that at intervals certain individuals have appeared who are gifted with the power of transcendent realization—or Illumination. Their experiences constitute a definite advance in man's relation with the Infinite. Moreover, the author shows from available records that this transfiguring endowment of Illumination is on the increase, and he gives full details of practically all the cases on record up to the time when the book was written.

Cosmic Purpose and Human Consciousness Oct 05 2021
Scientists have constructed a vast and wonderful objective universe by building on the "quantitative" features of their experience. That universe cannot support cosmic purpose because it is without consciousness--it is completely

inert. However, the "qualitative" features of human experience suggest the existence of an equally vast and wonderful subjective universe that complements the objective universe in scope and in reality. This edifice can and, I believe, does support a form of cosmic purpose that is determined by its structure, and by its relationship to human consciousness. Every experience of yours is an amalgam of quantitative and qualitative parts that comprise your own objective and subjective worlds. Each one is as real a part of your life as the other; and each is as real a part of the wider universe as the other. There is no reason to

assign reality to one and illusory to the other. Using a minimal construction based on qualitative experience, the subjective universe is found to have a cosmic purpose that is consequential for humans. We look for and find evidence of that purpose in human history. *Cosmic Consciousness* Sep 04 2021 Richard M. Bucke's astonishing treatise on the human mind discusses and attempts to explain mystical experiences in the context of evolutionary change in the brain. During his mid-thirties, Bucke underwent a feeling of intense revelation and felt distinctly enlightened for a short time. Although the period of enlightenment passed, it had

an immense impact upon Bucke's outlook, steering his personal and professional life in a directions he had never before envisioned. He found the experience a permanent boon to his well-being, and was able to work and enjoy life more than he formerly had. This book is an attempt to explain the various mystical feelings of enlightenment which humans have experienced over the millennia of recorded history. Bucke's opinion is that these phenomena are becoming commoner over time, and represent an evolution of the human mind. He postulates that these experiences will become commoner as centuries

go by, and become accepted as an ordinary, then eventually as a necessary or innate part of human life. The term and title of this book, 'Cosmic Consciousness', is shorthand for the state which human beings enter during a mystical experience. A higher mental echelon free of fear or negative emotions, and characterized by greater perception and understanding of the world, Bucke stresses that Cosmic Consciousness cannot be adequately explained in spoken language. The experience in itself is indescribably different; those who attempt to couch it in words inevitably fall short, or even appear deceptive to other, skeptical individuals. In

an attempt to convince the reader that Cosmic Consciousness exists and is already instrumental to the human condition, Bucke examines a series of people he believes also underwent such a state. The figures he discusses include religious figures such as Mohammed and St. John of the Cross, philosophers such as Socrates and Leo Tze, scientists such as Francis Bacon, and authors such as Benedict Spinoza, Walt Whitman and William Blake. This early text of psychology sees Bucke speak freely about the mystical and spiritual aspects of the human mind. At the time, the discipline was in its infancy, and philosophical

discussions of unusual, spiritual experiences were a welcome addition. Although many of Bucke's views have been disproved or refuted by testing and research, *Cosmic Consciousness* continues to be considered a classic for its incisive, frank discussions of unusual experiences. It is today considered a good companion text to the masterwork of William James; *The Varieties of Religious Experience*. *Cosmic Consciousness* Sep 16 2022 In one of the classic books on the mystical experience, Buck outlines the development of various faculties in the history of man and the growth of an individual. He believes we are

witnessing a continuous psychical revolution and that people like Buddha and Jesus, to name a couple, are the forerunners of the beings who will eventually inhabit the earth.

Mar 30 2021 Thomas Cowan was a 20-year-old Duke grad—bright, skeptical, and already disillusioned with industrial capitalism—when he joined the Peace Corps in the mid-1970s for a two-year tour in Swaziland. There, he encountered the work of Rudolf Steiner and Weston A. Price—two men whose ideas would fascinate and challenge him for decades to come. Both drawn to the art of healing and

repelled by the way medicine was—and continues to be—practiced in the United States, Cowan returned from Swaziland, went to medical school, and established a practice in New Hampshire and, later, San Francisco. For years, as he raised his three children, suffered the setback of divorce, and struggled with a heart condition, he remained intrigued by the work of Price and Steiner and, in particular, with Steiner's provocative claim that the heart is not a pump. Determined to practice medicine in a way that promoted healing rather than compounded ailments, Cowan dedicated himself to understanding whether

Steiner's claim could possibly be true. And if Steiner was correct, what, then, is the heart? What is its true role in the human body? In this deeply personal, rigorous, and riveting account, Dr. Cowan offers up a daring claim: Not only was Steiner correct that the heart is not a pump, but our understanding of heart disease—with its origins in the blood vessels—is completely wrong. And this gross misunderstanding, with its attendant medications and risky surgeries, is the reason heart disease remains the most common cause of death worldwide. In *Human Heart, Cosmic Heart*, Dr. Thomas Cowan presents a new way of

understanding the body's most central organ. He offers a new look at what it means to be human and how we can best care for ourselves—and one another.

The True Divinity - Volume I

May 20 2020 A culmination of author Srichakra Ganeswar's thirty years of divine experiences on the path to salvation. The True Divinity scientifically explains the powers of various godly souls and misguided beliefs existing in humanity for the past 3,000 years about the widespread cosmic energy particles as a great supreme God. After death, human soul energy is formed for everybody, and it gets scattered into individual energy particles within 3-6 months. The dispersal of soul energy is not real salvation. Salvation means that a human soul must exist as an intact soul forever without energy

dispersal for which a soul must get the support of already existing godly souls and know various cosmic energy absorption techniques from rituals and cosmos. Srichakra Ganeswar discusses a host of subjects, including: • Humans' beliefs about cosmic energy as a supreme great God. • Differences of eternal human souls as gods and saintly souls as gods, Impact on worshipping of gods and cosmic energy with and without their Idols/portraits, • Gods and their cosmic energy handling powers to exist an eternal soul and their skills to create divine weapons using cosmic energy • The powers of cosmic energy particles in various colors,

mantra vibrations and reflections around various objects, idols, portraits, tattoos in human body, Cosmic energy particle's vibrations and reflections, etc. • Trinities and other gods' names by cosmic vibrations. • Various status of human souls that roam around on the streets and graveyards in the afterlife and the hierarchy of various godly souls who reside in worship places, Humans' beliefs of avatars and reincarnations in divinity and Dev Lok (God's residing place) is on the earth or the sky, etc. Srichakra Gnaneswar, an educationalist, has been worshipping the ancient gods through fire rituals for the past 20 years as done by earlier

Rishis. He has established divine connection with many gods. He has explained scientifically the secrets of attaining an eternal human soul status (Salvation) through the help of various gods, cosmic energy, energizing rituals, various practices for a human soul etc. in this volume I of True Divinity.

Nature Nov 25 2020 This volume is based upon the sixth series of lectures delivered at Yale University on the Foundation established by the late Dwight H. Terry of Plymouth, Connecticut, through his gift of an endowment fund for the delivery and subsequent publication of "Lectures on

Religion in the Light of Science and Philosophy." The deed of gift declares that "the object of this Foundation is not the promotion of scientific investigation and discovery, but rather the assimilation and interpretation of that which has been or shall be hereafter discovered, and its application to human welfare, especially by the building of the truths of science and philosophy into the structure of a broadened and purified religion.

Cosmic Influences on Human Behavior Nov 06 2021

The True Divinity Apr 18 2020 This book scientifically clarifies various misguided beliefs existing in humanity for

the past 3000 years about the widespread cosmic energy particles (atoms) as god. Nature and its cosmic energy are believed as god by majority of people. But the eternal human souls are real gods. After death, when a human soul energy gets scattered into individual energy particles and merge with the cosmos, then it is not real salvation. Salvation means how a human soul can sustain as a strong soul and thereafter by leaning cosmic energy secrets, how it can become an eternal soul and further how it attains a godly soul status by the help of already existing senior godly souls are explained. Depends on the individual cosmic

powers of a human soul, how a human soul gets a suitable divine title and resides in temples as god are explained. Beliefs about god and human are the same, human cannot become a god, cosmic energy of planets as god are clarified. In the afterlife, various status of human souls and their living places on the earth such as Heaven, Hell, Deva lok, Para lok, Patala lok, and Pithru lok are explained. The impact of cosmic energy in colours, mantra vibrations, around various objects and portraits, in idols and temples are explained scientifically. Once a human soul attains a god status, then there is no rebirth for such godly soul. But humans falsely

believe that god is taking rebirth as avatar. The impossibility of a single god to grant salvation to millions of people is explained.

Cosmic Memory Jul 02 2021

In the best tradition of ancient wisdom literature, Cosmic Memory reconstructs, from the akashic record, events that span the time between the origin of the Earth and the beginning of recorded history. This spiritual research includes a profound investigation of the origins, achievements, and fate of the Atlanteans and Lemurians--the remarkable "lost" root races that developed the first concepts of "good" and "evil," manipulated natural forces, laid the foundation for

human legal and ethical systems, and defined and nurtured the distinctive yet complementary powers of men and women that brought humankind, many centuries ago, to its highest artistic, intellectual, and spiritual attainments. Through this discussion of our true origins, Cosmic Memory offers a genuine foundation for our lives, allowing us to realize our real value, dignity, and essence. The reader is shown our human connection with the world around us as well as our highest goals and true destiny. This is a key volume for understanding Rudolf Steiner's early development as a Theosophist and how his ideas,

terminology, and formulations during that time fit into the development of his anthroposophic epistemology and Christology. Contents: Contemporary Civilization in the Mirror of the Science of the Spirit From the Akash Chronicle Our Atlantean Ancestors Transition of the Fourth into the Fifth Root Race The Lemurian Race The Division into Sexes The Last Period before the Division into Sexes The Hyperborean and Polarean Epoch Beginning of the Present Earth: Extrusion of the Sun Extrusion of the Moon Some Necessary Points of View On the Origin of the Earth The Earth and Its Future The Life of Saturn The Life of the Sun Life

on the Moon The Life of Earth The Fourfold Man of Earth Answers to Questions Prejudices Arising from Alleged Science (1904) This volume is a translation of Aus der Akasha-Chronik (GA 11). "Rudolf Steiner shows that the insoluble link between humanity and cosmos is the fundamental basis of evolution. As human beings have participated in the development of the world we know today, so their achievements are directly connected with the ultimate destiny of the universe. In human hands rests the freedom to shape the future course of creation. Knowledge of our exalted origins and of the path

we have followed is indispensable if we are to evolve a future worthy of responsible human beings.... Through a study of Steiner's writings, one can come to a clear, reasonable, comprehensive understanding of human beings and their place in the universe." --Paul M. Allen

The Cosmic Game Apr 11 2022

The Cosmic Game discusses the broadest philosophical, metaphysical and spiritual insights gleaned in Grof's

research concerning human nature and reality, addressing the most fundamental questions human beings have asked about the nature of existence since time immemorial. Insights from research into nonordinary states of consciousness portray existence as an astonishing play of the cosmic creative principle that transcends time, space, linear causality, and polarities of every kind and suggest an identity of the individual psyche in its furthest reaches with the universal creative principle and the totality of existence. This identity of the human being with the Divine is the ultimate secret that lies at the core of all

great spiritual traditions.

Cosmic Consciousness and

Human Excellence Nov 18 2022 Cosmoconsciousness, or cosmic consciousness, is a term used to characterize a transcendence of the limits of self-consciousness. As an ultra-state of illumination of the mind, the roots of the conception are embodied in the quest for a spiritual connection with multi-dimensional cosmos. This quest searches for spiritual development as a pathway to human excellence, and can be associated with the mystics of ancient wisdom, as well as contemporary psycho-spiritual analysts. After its emergence in the late 19th century, cosmic consciousness rapidly became a source of inspiration for transpersonal

psychology, moral therapy, and a thoughtful link to mystical quantum physics. By encouraging a spiritual way of perceiving the real world, cosmic consciousness also provides a source of inspiration for human excellence as the central idea of global ethics. In this perspective, the world cannot be changed for the better without changing individual consciousness. Global concerns, including ecological issues, violence and acts of terrorism, materialistic gratification and hedonism, could not be addressed effectively unless people's consciousness is changed. Cosmic consciousness, by the very perception of the inner

life, has the potential to struggle with global concerns, and hence, it holds a promise of human excellence. This book discusses cosmic consciousness against the backdrop of the emergence of the rational and autonomous conception of the self, and the modern psychological depiction of selfhood. It places the idea of cosmic consciousness at the centre of contemporary arguments on the nature of consciousness. *IISSIIDIOLOGY Vol 3. Variety of Forms of Creative Realization of the Cosmic Human* Jan 28 2021 The third volume of «IISSIIDIOLOGY Fundamentals» allows readers to go deeper into yet

completely unexplored by us structures, which provide functioning of human Self-Consciousness and its interconnections with Self-Consciousness Forms, focused by it. First two volumes of «IISSIIDIOLOGY Fundamentals» thoroughly describe the deep Nature of Causes and Mechanisms of Creative Activity of everything manifested in multidimensional and different-quality Macrocosm, including also qualitative Basis of Focus Dynamics of Formo-Creators of Universe Structures. The third volume in its turn focuses on the detailed description of basic Principles of manifestation of Human and

other Self-Consciousness Forms in all the diversity of multidimensional ranges of Tertiary Illusion. To allow the reader to fully comprehend the essence of the notion «Self-Consciousness Form», the author describes realization functions of these structures at the example of subjective formation - as a result of life creativity of every personality - of so called personalistic Worlds, which goes far beyond existing scientific notions about the surrounding reality and peculiarities of interaction between Forms structuring it, whether it is a human, a planet, or an elementary particle. Furthermore, he describes multidimensional variety of

Forms of lluvvumic Direction of development and characteristics of focus realization of Collective Cosmic Intelligence of humanity as a unified LLUU-VVU-Entity. The third volume ends with a detailed description of multi-level manifestation of Plasma Forces Range of our Universe, which are described from a position of their subjective interpretation through the specific peculiarities of human Perception systems. Endless inner transformations of Universe Illusion, as mechanisms of evolutional growth of the Cosmic Human on its Way to its Universe Future, lets inquisitive readers to form in their Self-
