"A story of love and hope as interweaving characters display: how all moments, big and small, can measure a life. If you want joy, love, romance, and hope—read with us." —Jenna Bush Hager A luminous, spirit-lifting blockbuster for readers of The Midnight Library. Eight ordinary people. One extraordinary choice. It seems like any other day. You wake up, pour a cup of coffee, and head out. But today, when you open your front door, waiting for you is a small wooden box. This box holds your fate inside: the answer to the exact number of years you will live. From suburban doorsteps to desert tents, every person on every continent receives the same box. In an instant, the world is thrust into a collective frenzy. Where did these boxes come from? What do they mean? Is there truth to what they promise? As society comes together and pulls apart, everyone faces the same shocking choice: Do they wish to know how long they'll live? And, if so, what will they do with that knowledge? The Measure charts the dawn of this new world through an unforgettable cast of characters whose decisions and fates interweave with one another: best friends whose dreams are forever entwined, pen pals finding refuge in the unknown, a couple who thought they didn't have to rush, a doctor who cannot save himself, and a politician whose box becomes the powder keg that ultimately changes everything. **invigorating story about family, friendship, hope, and destiny that encourages us to live life to the fullest. An encyclopedia designed especially to meet the needs of elementary, junior high, and senior high school students. #1 New York Times Bestseller “THIS. This is the right book for right now. Yes, learning requires focus. But, unlearning and relearning requires much more—it requires choosing courage over comfort. In Think Again, Adam Grant weaves together research and storytelling to help us build the intellectual and emotional muscle we need to stay curious enough about the world to actually change it. I’ve never felt so hopeful about what I don’t know.” —Brené Brown, Ph.D., #1 New York Times bestselling author of Dare to Lead The bestselling author of Give and Take and Originals examines the critical art of rethinking: learning to question your opinions and open other people's minds, which can position you for excellence at work and wisdom in life Intelligence is usually seen as the ability to think and learn, but in a rapidly changing world, there's another set of cognitive skills that might matter more: the ability to rethink and unlearn. In our daily lives, too many of us favor the comfort of conviction over the discomfort of doubt. We listen to opinions that make us feel good, instead of ideas that make us think hard. We see disagreement as a threat to our egos, rather than an opportunity to learn. We surround ourselves with people who agree with our conclusions, when we should be gravitating toward those who challenge our thought process. The result is that our beliefs get brittle long before our bones. We think too much like preachers defending our sacred beliefs, prosecutors proving the other side wrong, and politicians campaigning for approval--and too little like scientists searching for truth. Intelligence is no cure, and it can even be a curse: being good at thinking can make us worse at rethinking. The brighter we are, the blinder to our own limitations we can become. Organizational psychologist Adam Grant is an expert on opening other people's minds--and our own. As Wharton's top-rated professor and the bestselling author of Originals and Give and Take, he makes it one of his guiding principles to argue like he's right but listen like he's wrong. With bold ideas and rigorous evidence, he investigates how we can embrace the joy of being wrong, bring nuance to charged conversations, and build schools, workplaces, and communities of lifelong learners. You'll learn how an international debate champion wins arguments, a Black musician persuades white supremacists to abandon hate, a vaccine whisperer convinces concerned parents to immunize their children, and Adam has coaxed Yankees fans to root for the Red Sox. Think Again reveals that we don't have to believe everything we think or internalize everything we feel. It's an invitation to let go of views that are no longer serving us well and prize mental flexibility over foolish consistency. If knowledge is power, knowing what we don't know is wisdom. NOW A MAJOR MOTION PICTURE—The #1 New York Times bestselling worldwide sensation with more than 15 million copies sold, hailed by The New York Times Book Review as “a painfully beautiful first novel that is at once a murder**

mystery, a coming-of-age narrative and a celebration of nature.” For years, rumors of the “Marsh Girl” have haunted Barkley Cove, a quiet town on the North Carolina coast. So in late 1969, when handsome Chase Andrews is found dead, the locals immediately suspect Kya Clark, the so-called Marsh Girl. But Kya is not what they say. Sensitive and intelligent, she has survived for years alone in the marsh that she calls home, finding friends in the gulls and lessons in the sand. Then the time comes when she yearns to be touched and loved. When two young men from town become intrigued by her wild beauty, Kya opens herself to a new life—until the unthinkable happens. *Where the Crawdads Sing* is at once an exquisite ode to the natural world, a heartbreaking coming-of-age story, and a surprising tale of possible murder. Owens reminds us that we are forever shaped by the children we once were, and that we are all subject to the beautiful and violent secrets that nature keeps. As Carol's father finally decides, after 60 years, to open up about his traumatic World War II experiences in Italy, Carol's daughter runs into her own trouble, leading Carol to further explore her family's buried traumas and sorrows. Winner • National Council of Teachers of English - George Orwell Award for Distinguished Contribution to Honesty and Clarity in Public Language The “philosopher of truth” (Jill Lepore, *The New Yorker*) returns with a clear-eyed and timely critique of our culture’s narcissistic obsession with thinking that “we” know and “they” don’t. Taking stock of our fragmented political landscape, Michael Patrick Lynch delivers a trenchant philosophical take on digital culture and its tendency to make us into dogmatic know-it-alls. The internet—where most shared news stories are not even read by the person posting them—has contributed to the rampant spread of “intellectual arrogance.” In this culture, we have come to think that we have nothing to learn from one another; we are rewarded for emotional outrage over reflective thought; and we glorify a defensive rejection of those different from us. Interweaving the works of classic philosophers such as Hannah Arendt and Bertrand Russell and imposing them on a cybernetic future they could not have possibly even imagined, Lynch delves deeply into three core ideas that explain how we’ve gotten to the way we are: • our natural tendency to be overconfident in our knowledge; • the tribal politics that feed off our tendency; • and the way the outrage factory of social media spreads those politics of arrogance and blind conviction. In addition to identifying an ascendant “know-it-all-ism” in our culture, Lynch offers practical solutions for how we might start reversing this dangerous trend—from rejecting the banality of emoticons that rarely reveal insight to embracing the tenets of Socrates, who exemplified the humility of admitting how little we often know about the world, to the importance of dialogue if we want to know more. With bracing and deeply original analysis, Lynch holds a mirror up to American culture to reveal that the sources of our fragmentation start with our attitudes toward truth. Ultimately, *Know-It-All Society* makes a powerful new argument for the indispensable value of truth and humility

Causes of increased population such as mechanization use of fossil fuels, improvements in crop yields, and improvements in medical care are discussed. Affects of increased population are examined including poverty, environmental degradation, stress, crowding, poor hygiene, disease, competition for resources, and demographic transitions. Climate change due to fossil fuel use and deforestation is also covered. Factors that limit population growth such as natural disasters and epidemics are explored, as are efforts to decrease world population such as lowering birth rates, replacement level family planning, education, and expanding women's rights. Programs that address world population such as the Transition Town and the Post Carbon Institute are also introduced. Engaging text, informative sidebars, and color photographs present information realistically, leaving readers with a thorough, honest interpretation of world population. "Durastanti casts the universal drama of the family as the sieve through which the self—woman, artist, daughter—is filtered and known." —Ocean Vuong A work of fiction about being a stranger in your own family and life. Every family has its own mythology, but in this family none of the myths match up. Claudia's mother says she met her husband when she stopped him from jumping off a bridge. Her father says it happened when he saved her from an attempted robbery. Both parents are deaf but couldn't be more different; they can't even agree on how they met, much less who needed saving. Into this unlikely yet somehow inevitable union, our narrator is born. She comes of age with her brother in this strange, and increasingly estranged, household split between a small village in southern Italy and New York City. Without even sign language in common - their parents have not bothered to teach them - family communications are chaotic and rife with misinterpretations, by turns hilarious and devastating. An outsider in every way, she longs for a freedom she's not even sure exists. Only books and punk rock—and a tumultuous relationship—begin to show her the way to create her own mythology, to construct her own version of the story of her life. Kinetic, formally dazzling, and spectacularly original, this book is a funny and profound portrait of an unconventional family that makes us look anew at

how language shapes our understanding of ourselves. Press the squishy button and sing along to "If You're Happy and You Know It" while you explore the forest with the everyone's favorite caterpillar! Eric Carle's classic, collage-style artwork engages and delights little readers. If you're happy and you know it...read this book!! 33,000 pages 44 million words 10 billion years of history 1 obsessed man Part memoir and part education (or lack thereof), *The Know-It-All* chronicles NPR contributor A.J. Jacobs's hilarious, enlightening, and seemingly impossible quest to read the Encyclopaedia Britannica from A to Z. To fill the ever-widening gaps in his Ivy League education, A.J. Jacobs sets for himself the daunting task of reading all thirty-two volumes of the Encyclopaedia Britannica. His wife, Julie, tells him it's a waste of time, his friends believe he is losing his mind, and his father, a brilliant attorney who had once attempted the same feat and quit somewhere around Borneo, is encouraging but, shall we say, unconvinced. With self-deprecating wit and a disarming frankness, *The Know-It-All* recounts the unexpected and comically disruptive effects Operation Encyclopedia has on every part of Jacobs's life -- from his newly minted marriage to his complicated relationship with his father and the rest of his charmingly eccentric New York family to his day job as an editor at *Esquire*. Jacobs's project tests the outer limits of his stamina and forces him to explore the real meaning of intelligence as he endeavors to join Mensa, win a spot on *Jeopardy!*, and absorb 33,000 pages of learning. On his journey he stumbles upon some of the strangest, funniest, and most profound facts about every topic under the sun, all while battling fatigue, ridicule, and the paralyzing fear that attends his first real-life responsibility -- the impending birth of his first child. *The Know-It-All* is an ingenious, mightily entertaining memoir of one man's intellect, neuroses, and obsessions and a soul-searching, ultimately touching struggle between the all-consuming quest for factual knowledge and the undeniable gift of hard-won wisdom.

A luminous novel of a powerfully intuitive young girl's coming-of-age in a small, Midwest town in the late 1960s. Eleven-year-old Grace Carter has a talent for hiding things. She's had plenty of practice, burying thoughts and feelings that might anger her strict Evangelical pastor father, and concealing the deep intuition she carries inside. *The Knowing*, as Grace calls it, offers glimpses of people's pasts and futures. It enables her to see into the depth of her mother's sadness, and even allows Grace to talk to Isaac, her twin brother who died at birth. To her wise, loving Aunt Pearl, *The Knowing* is a family gift; to her daddy, it's close to witchcraft. Grace can't see into someone's thoughts without their permission. But it doesn't take her special talent to know that her small community is harboring its share of secrets. A young girl has gone missing. Within Grace's own family too, the cracks are widening, as her sisters Hope, Joy, and Chastity enjoy the normal life that eludes Grace. It's Grace's kinship with other outsiders that keeps her afloat—Lyle, a gentle, homeless man, and Lola, a free-spirited new girl at school. But when her mother lapses into deep depression after bringing

home a new baby, Grace will face a life-changing choice—ignore her gift and become the obedient daughter her father demands, or find the courage to make herself heard, even if it means standing apart... “A heartfelt and beautifully crafted coming-of-age debut...Don't miss this one.”—Lesley Kagen, New York Times bestselling author

Everyone has an opinion, anecdote, or horror story about women and work. Now the acclaimed author of *What the Most Successful People Do Before Breakfast* shows how real working women with families are actually making the most of their time. “Having it all” has become the subject of countless books, articles, debates, and social media commentary, with passions running high in all directions. Many now believe this to be gospel truth: Any woman who wants to advance in a challenging career has to make huge sacrifices. She’s unlikely to have a happy marriage, quality time with her kids (assuming she can have kids at all), a social life, hobbies, or even a decent night’s sleep. But what if balancing work and family is actually not as hard as it’s made out to be? What if all those tragic anecdotes ignore the women who quietly but consistently do just fine with the juggle? Instead of relying on scattered stories, time management expert Laura Vanderkam set out to add hard data to the debate. She collected hour-by-hour time logs from 1,001 days in the lives of women who make at least \$100,000 a year. And she found some surprising patterns in how these women spend the 168 hours that every one of us has each week. Overall, these women worked less and slept more than they assumed they did before they started tracking their time. They went jogging or to the gym, played with their children, scheduled date nights with their significant others, and had lunches with friends. They made time for the things that gave them pleasure and meaning, fitting the pieces together like tiles in a mosaic—without adhering to overly rigid schedules that would eliminate flexibility and spontaneity. Vanderkam shares specific strategies that her subjects use to make time for the things that really matter to them. For instance, they . . .

- \* Work split shifts (such as seven hours at work, four off, then another two at night from home). This allows them to see their kids without falling behind professionally.
- \* Get creative about what counts as quality family time. Breakfasts together and morning story time count as much as daily family dinners, and they’re often easier to manage.
- \* Take it easy on the housework. You can free up a lot of time by embracing the philosophy of “good enough” and getting help from other members of your household (or a cleaning service).
- \* Guard their leisure time. Full weekend getaways may be rare, but many satisfying hobbies can be done in small bursts of time. An hour of crafting feels better than an hour of reality TV. With examples from hundreds of real women, Vanderkam proves that you don’t have to give up on the things you really want. *I Know How She Does It* will inspire you to build a life that works, one hour at a time.

Dr. John Bargh, the world's leading expert on the unconscious mind, presents a "brilliant and convincing book" (Malcolm Gladwell) cited as an outstanding read of 2017 by Business Insider and The Financial Times—giving us an entirely new understanding of the hidden mental processes that secretly govern every aspect of our behavior. For more than three decades, Dr. John Bargh has conducted revolutionary research into the unconscious mind, research featured in bestsellers like Blink and Thinking Fast and Slow. Now, in what Dr. John Gottman said was "the**

most important and exciting book in psychology that has been written in the past twenty years," Dr. Bargh takes us on an entertaining and enlightening tour of the forces that affect everyday behavior while transforming our understanding of ourselves in profound ways. Dr. Bargh takes us into his labs at New York University and Yale—where he and his colleagues have discovered how the unconscious guides our behavior, goals, and motivations in areas like race relations, parenting, business, consumer behavior, and addiction. With infectious enthusiasm he reveals what science now knows about the pervasive influence of the unconscious mind in who we choose to date or vote for, what we buy, where we live, how we perform on tests and in job interviews, and much more. Because the unconscious works in ways we are completely unaware of, *Before You Know It* is full of surprising and entertaining revelations as well as useful tricks to help you remember items on your to-do list, to shop smarter, and to sleep better. *Before You Know It* is "a fascinating compendium of landmark social-psychology research" (Publishers Weekly) and an introduction to a fabulous world that exists below the surface of your awareness and yet is the key to knowing yourself and unlocking new ways of thinking, feeling, and behaving. As seen on Oprah's Super Soul Sunday A beacon of hope in the face of our current world crises, this uplifting book demonstrates how embracing our interconnectedness is key to world transformation In a time of social and ecological crisis, what can we as individuals do to make the world a better place? This inspirational and thought-provoking book serves as an empowering antidote to the cynicism, frustration, paralysis, and overwhelm so many of us are feeling, replacing it with a grounding reminder of what's true: we are all connected, and our small, personal choices bear unsuspected transformational power. By fully embracing and practicing this principle of interconnectedness—called interbeing—we become more effective agents of change and have a stronger positive influence on the world. Throughout the book, Eisenstein relates real-life stories showing how small, individual acts of courage, kindness, and self-trust can change our culture's guiding narrative of separation, which, he shows, has generated the present planetary crisis. He brings to conscious awareness a deep wisdom we all innately know: until we get ourselves in order, any action we take—no matter how good our intentions—will ultimately be wrong-headed and wrong-hearted. Above all, Eisenstein invites us to embrace a radically different understanding of cause and effect, sounding a clarion call to surrender our old worldview of separation, so that we can finally create the more beautiful world our hearts know is possible. With chapters covering separation, interbeing, despair, hope, pain, pleasure, consciousness, and many more, the book invites us to let the old Story of Separation fall away so that we can stand firmly in a Story of Interbeing. Malcolm Gladwell, host of the podcast Revisionist History and author of the #1 New York Times bestseller *Outliers*, offers a powerful examination of our interactions with strangers and why they often go wrong—now with

**a new afterword by the author. A Best Book of the Year: The Financial Times, Bloomberg, Chicago Tribune, and Detroit Free Press How did Fidel Castro fool the CIA for a generation? Why did Neville Chamberlain think he could trust Adolf Hitler? Why are campus sexual assaults on the rise? Do television sitcoms teach us something about the way we relate to one another that isn't true? Talking to Strangers is a classically Gladwellian intellectual adventure, a challenging and controversial excursion through history, psychology, and scandals taken straight from the news. He revisits the deceptions of Bernie Madoff, the trial of Amanda Knox, the suicide of Sylvia Plath, the Jerry Sandusky pedophilia scandal at Penn State University, and the death of Sandra Bland—throwing our understanding of these and other stories into doubt. Something is very wrong, Gladwell argues, with the tools and strategies we use to make sense of people we don't know. And because we don't know how to talk to strangers, we are inviting conflict and misunderstanding in ways that have a profound effect on our lives and our world. In his first book since his #1 bestseller David and Goliath, Malcolm Gladwell has written a gripping guidebook for troubled times. Over a decade ago, Simon Sinek started a movement that inspired millions to demand purpose at work, to ask what was the WHY of their organization. Since then, millions have been touched by the power of his ideas, and these ideas remain as relevant and timely as ever. START WITH WHY asks (and answers) the questions: why are some people and organizations more innovative, more influential, and more profitable than others? Why do some command greater loyalty from customers and employees alike? Even among the successful, why are so few able to repeat their success over and over? People like Martin Luther King Jr., Steve Jobs, and the Wright Brothers had little in common, but they all started with WHY. They realized that people won't truly buy into a product, service, movement, or idea until they understand the WHY behind it. START WITH WHY shows that the leaders who have had the greatest influence in the world all think, act and communicate the same way—and it's the opposite of what everyone else does. Sinek calls this powerful idea The Golden Circle, and it provides a framework upon which organizations can be built, movements can be led, and people can be inspired. And it all starts with WHY. We've all had cringe-worthy moments in our past, and many are experiencing them still every day, only to realize it down the road. The chances for such occurrences are greatly reduced with the advice in I Know You Think You Know it All. It's not too late. A straight-talking guide for the newest members of the workforce, with road-tested advice for landing a job, navigating the new world of work, establishing a personal brand, and getting the recognition (and money) you deserve. What happens after you've landed the job, settled in, and begun to make a difference-where do you go from here? What if you feel stuck in what you thought would be your dream profession? New York Times bestselling author Mika Brzezinski and producer Daniela Pierre-Bravo provide an essential manual for those crucial next steps. Earn It! is a practical career guidebook that not only helps you get your foot in the door; it also shows you how to negotiate a raise, advocate for more responsibility, and figure out whether you're in the career that's right for you. A blueprint for your future success, Earn It! features insightful and inspiring interviews with leaders in media, fashion, and business, recruiters, HR, execs, and kickass young female entrepreneurs like Danielle Weisberg and Carly Zakin of theSkimm, Vimeo CEO Anjali Sud, and Jane Park, founder of the cosmetic subscription company Julep. A high school senior navigates messy boys, messier relationships, and the struggle of never quite living up to her Taiwanese mother's expectations. A modern Judy Blume meets Jenny Han, Boys I Know is a raw and realistic look into the lives of teen girls, examining the complex overlap between teen sexuality and Asian American identity. A sharp and unflinchingly honest journey of self-**

discovery. June Chu has always been the "just good enough" girl. Good enough to line the shelves with third-place trophies and steal secret kisses from her AP Bio partner, Rhys. But not good enough to meet her mother's unrelenting expectations, or get Rhys to commit. While June's mother insists she follow in her (perfect) sister's footsteps and get a (full-ride) violin scholarship, June doesn't see the point in trying too hard if she's destined to fall short anyway. Instead, she focuses her efforts on making her relationship with Rhys "official." But after her methodically planned, tipsily executed scheme explodes on the level of a nuclear disaster, she flings herself into a new relationship with a guy who's not allergic to the word girlfriend. As the line between sex and love blurs, and pressure to map out her entire future threatens to burst, June will have to decide on whose terms she's going to live her life—even if it means fraying her relationship with her mother beyond repair. Poised on the precipice of mystery and longing, each character in *Now You Know It All* also hovers on the brink of discovery—and decision. Set in small-town North Carolina, or featuring eager Southerners venturing afar, these stories capture the crucial moment of irrevocable change. A young waitress accepts an offer from a beguiling stranger; a troubled boy attempts to unleash the villain from an internet hoax on his party guests; a smitten student finds more than she bargained for in her favorite teacher's attic; two adult sisters reconvene to uncover a family secret hidden in plain sight. With a sharp eye for rendering inner life, Joanna Pearson has a knack for creating both compassion and a looming sense of threat. Her stories peel back the layers of the narratives we tell ourselves in an attempt to understand the world, revealing that the ghosts haunting us are often the very shadows that we cast. No one knows more about everything—especially everything rude, clever, and offensively compelling—than John Waters. The man in the pencil-thin mustache, auteur of the transgressive movie classics *Pink Flamingos*, *Polyester*, *Hairspray*, *Cry-Baby*, and *A Dirty Shame*, is one of the world's great sophisticates, and in *Mr. Know-It-All* he serves it up raw: how to fail upward in Hollywood; how to develop musical taste, from *Nervous Norvus* to *Maria Callas*; how to build a home so ugly and trendy that no one but you would dare live in it; more important, how to tell someone you love them without emotional risk; and yes, how to cheat death itself. Through it all, Waters swears by one undeniable truth: "Whatever you might have heard, there is absolutely no downside to being famous. None at all." Studded with cameos, from *Divine* and *Mink Stole* to *Johnny Depp*, *Kathleen Turner*, *Patricia Hearst*, and *Tracey Ullman*, and illustrated with unseen photos from the author's personal collection, *Mr. Know-It-All* is Waters' most hypnotically readable, upsetting, revelatory book—another instant Waters classic. "Waters doesn't kowtow to the received wisdom, he flips it the bird . . . [Waters] has the ability to show humanity at its most ridiculous and make that funny rather than repellent." —Jonathan Yardley, *The Washington Post* "Carsick becomes a portrait not just of America's desolate freeway nodes—though they're

brilliantly evoked—but of American fame itself.” —Lawrence Osborne, *The New York Times Book Review* This book thoroughly explains how computers work. It starts by fully examining a NAND gate, then goes on to build every piece and part of a small, fully operational computer. The necessity and use of codes is presented in parallel with the appropriate pieces of hardware. The book can be easily understood by anyone whether they have a technical background or not. It could be used as a textbook. "[L]ike reading a great tragicomic Irish novel." —James Wood, *The New Yorker* "Masterful . . . astonishing." —Cullen Murphy, *The Atlantic* "A landmark history . . . Leavened by the brilliance of O'Toole's insights and wit." —Claire Messud, *Harper's Winner • 2021 An Post Irish Book Award — Nonfiction Book of the Year •* from the judges: "The most remarkable Irish nonfiction book I've read in the last 10 years"; "[A] book for the ages." A celebrated Irish writer's magisterial, brilliantly insightful chronicle of the wrenching transformations that dragged his homeland into the modern world. Fintan O'Toole was born in the year the revolution began. It was 1958, and the Irish government—in despair, because all the young people were leaving—opened the country to foreign investment and popular culture. So began a decades-long, ongoing experiment with Irish national identity. In *We Don't Know Ourselves*, O'Toole, one of the Anglophone world's most consummate stylists, weaves his own experiences into Irish social, cultural, and economic change, showing how Ireland, in just one lifetime, has gone from a reactionary "backwater" to an almost totally open society—perhaps the most astonishing national transformation in modern history. Born to a working-class family in the Dublin suburbs, O'Toole served as an altar boy and attended a Christian Brothers school, much as his forebears did. He was enthralled by American Westerns suddenly appearing on Irish television, which were not that far from his own experience, given that Ireland's main export was beef and it was still not unknown for herds of cattle to clatter down Dublin's streets. Yet the Westerns were a sign of what was to come. O'Toole narrates the once unthinkable collapse of the all-powerful Catholic Church, brought down by scandal and by the activism of ordinary Irish, women in particular. He relates the horrific violence of the Troubles**

**in Northern Ireland, which led most Irish to reject violent nationalism. In O'Toole's telling, America became a lodestar, from John F. Kennedy's 1963 visit, when the soon-to-be martyred American president was welcomed as a native son, to the emergence of the Irish technology sector in the late 1990s, driven by American corporations, which set Ireland on the path toward particular disaster during the 2008 financial crisis. A remarkably compassionate yet exacting observer, O'Toole in coruscating prose captures the peculiar Irish habit of "deliberate unknowing," which allowed myths of national greatness to persist even as the foundations were crumbling. Forty years in the making, We Don't Know Ourselves is a landmark work, a memoir and a national history that ultimately reveals how the two modes are entwined for all of us.**
