**Interdisciplinary Handbook of the Person-Centered Approach** Jul 22 2020 This book examines the scientific contribution and increasing relevance of the Person-Centered Approach (PCA) in psychotherapy. The direction taken in the book is to provide readers with a multidisciplinary and multi-perspective view as well as practical applications. Beyond the more conventional psychotherapy applications (client-centered, experimental, emotion-focused, child-centered, motivational interviewing, existential, filial, etc.) others have evolved including peace and conflict resolution work, encounter and T-groups, nonviolent communication, parent effectiveness training, person-centered planning for people with disabilities, relationship enhancement methods, learner-centered education, technology-enhanced learning environments, human relations leadership training, etc. Simultaneously, scientific disciplines were influenced by this perspective in less obvious ways. Hence, the major contribution of this book is to identify and characterize the key bridges—so far only partly recognized—between the PCA and several other disciplines. Based on the results of the bridge-building endeavor, the editors will propose an initial formulation of the PCA as a meta-theory. It is intended as a generic framework to solve complex, social problems and to stimulate further research and development concerning the human species in relationship to its environment.

**Fundamentals of Person-Centred Healthcare Practice** Nov 18 2022 Fundamentals of Person-Centred Healthcare Practice presents evidence-based perspectives on a broad range of approaches to person-centred practice in healthcare. Featuring contributions from internationally recognised experts in the field, this valuable textbook helps students and staff across healthcare disciplines understand the essential concepts of person-centred practice in various health-related contexts. Using the Person-centred Practice Framework—an innovative theoretical model based on more than two decades of research and practice—students develop a strong understanding of the different components of person-centredness, their connections and interactions, and how they can be implemented to promote positive healthcare experiences for care providers, service-users, and families. Recognising the dynamic and complex nature of person-centredness, the text emphasises the importance of a common language and a shared understanding of person-centred practice in all areas of healthcare, from hospital and social care systems, to mental health, learning disability, and rehabilitation services. This practical and insightful introduction to the subject: Provides engaging, student-friendly coverage of the central principles and practice of person-centredness within a multi-professional and interdisciplinary context Features cases and examples of person-centred practice in curricula worldwide Includes activities designed to support person-centred practitioner development Discusses the future of person-centred facilitation, learning and practice Offers real-world guidance on providing a holistic approach to developing person-centred relationships that facilitate meaningful connections with others Fundamentals of Person-Centred Healthcare Practice is an indispensable resource for nursing and allied health professionals, and an important reference work for educators, facilitators, supervisors and healthcare practitioners.

**Putting Patients First** Jun 20 2020 The second edition of Putting Patients First showcases what Planetree facilities and the Planetree organization have learned about the commitments, conditions, practices, and policies that are needed to do more than give lip service to being—patient-centered.—It should be read by every student, nurse, physician, administrator, trustee, policy maker, and lay person who is committed to creating healing environments, holding facilities accountable for their rhetoric, and truly reforming health care.

*Principles of a Patient-Centered Practice* Nov 06 2021

*Social Work Theory and Methods* Oct 05 2021 This gateway text lays the foundations for a thorough knowledge of the theory and methods that social workers need. Pulling together the work of a team of experts, this book uses the innovative “theorizing practice” approach, rather than the traditional “applying theory to practice” approach, thereby providing a much more satisfactory basis for understanding the relationship between theory and practice and making it easier for practitioners to employ theory in practice. Part I sets the scene by examining the relationship between theory and practice, how research can be used to inform practice and the important role of policy and organizational factors. Part II provides 14 chapters, each exploring a different theoretical approach. All in all, this book provides the ideal introduction to using social work theory and methods in practice.

**Client-Centered Practice in Occupational Therapy** Feb 21 2023 Directed primarily towards health care professionals outside of the United States, Client-Centered Practice in Occupational Therapy continues to be the only book that provides the reader with both the theoretical underpinnings of client-centred practice as well as guidance on the practical application of this approach. For this second edition, all chapters have been updated and new concepts incorporated, and a new chapter on paediatrics has been added. New chapter on paediatrics, providing valuable guidance in how to apply this approach New authors writing the mental health chapter giving a different focus that will challenge therapists working with this client group All chapter have been updated to include current literature and current views on the application of a client-centred approach

*The Heart of ACT* Sep 23 2020 In The Heart of ACT, renowned acceptance and commitment therapy (ACT) trainer Robyn Walser explores ACT as a process-based therapy incorporating interpersonal, intrapersonal, and overarching and ongoing processes, as well as the integration of six core components of psychological flexibility to connect clinicians to the dynamic and relational implementation of ACT. Engaging clinical scenarios, therapeutic insights, and supervision dialogues are offered to help clinicians move beyond their conceptual understanding of ACT principles to master the nuances of the therapeutic relationship at the heart of ACT. Using the tips and strategies in this professional guide, you’ll develop a flexible, grounded, and client-centered practice. With this comprehensive resource, you’ll learn to cultivate an organic, process-driven practice, grounded in the heart of the therapeutic relationship and responsive to clients in the moment. The Heart of ACT is designed to mimic the supervision experience by presenting material in thought-provoking chapters grounded in real-life clinical situations and challenges. In the book, you’ll also find supervision dialogues inspired by Walser’s work with her supervisees, Carlton Coulter and Manuela O’Connell. Carlton and Manuela comment and ask questions related to the material in the book and their own ACT learning process. These are then addressed by Walser in a dialogue designed to assist clinicians in connecting to the material. These sections mimic the helpful mentoring process of one-on-one training and supervision, and offer insights into specific therapeutic challenges that can unfold in structured conversation. As the applications of ACT grow, so does the need for up-to-date professional resources. Unlike many advanced ACT books that focus on procedures and techniques, The Heart of ACT focuses on the heart of the therapeutic relationship, as well as the “soft skills” that are difficult to describe, but which often mark the difference between a merely good clinician and an excellent one. If you’re looking to take your ACT delivery to a new, exciting level, this book is a must-have addition to your professional library.

**Veteran-Centered Care in Education and Practice** Mar 18 2020 Veteran-Centered Care in Education and Practice: An Essential Guide for Nursing Faculty addresses the mandate to improve veteran healthcare as a national priority, highlighting the tremendous impact nurses can make on improving veteran health. It provides guidance on how faculty can integrate veteran-centered care into nursing curricula, ultimately improving veteran-centered care at the bedside and in the community. The expert authors utilize a holistic approach to veteran needs, beginning with an overview of the importance of veteran health in nursing education and a primer of military culture and lifestyle, and transitions. A wide range of veteran-specific healthcare issues are addressed, including occupational and environmental exposures, common physical-related issues, mental-health issues, and special topics such as women’s health and military sexual trauma, gender issues, and end-of-life concerns. ; This book offers innovative teaching and learning strategies to build a base of knowledge related to nursing prioritization of veteran health care needs, filling a notable gap in nursing literature. It includes teaching strategies for the classroom and clinical setting that graduate/undergraduate nurse educators may employ to integrate veteran content into existing courses or to build a Veteran Health elective or topics course. It outlines key competencies and essential knowledge faculty and students need to teach and provide basic veteran-centered care. Also covered are the expansion of Veteran-to-BSN programs, current research on veterans transitioning to the classroom, and strategies to enhance learning within this student population and maximize their skills and leadership abilities. Key Features: Discusses national and organizational efforts to improve veteran-centered care Guides nursing faculty on how to address the multifaceted nature of veteran health needs in existing nursing courses and curricula at all educational levels Outlines key competencies and essential knowledge faculty and students need to teach and provide basic veteran-centered care Includes evidence-based instructional strategies and resources to incorporate into classroom and clinical settings Features learning activities to enhance knowledge acquisition Details the unique needs of the veteran student population, as well as strategies to enhance their learning, while maximizing their skills and leadership abilities

*The Task-centred Book* Feb 26 2021 Peter Marsh and Mark Doel’s new book is a radical departure from traditional literature on social work methods. The main reference point is the voice of practitioners, service users and carers, as researched and developed by the authors over twenty years.

**Person-Centred Practice in Nursing and Health Care** Jan 28 2021 Person-centred Practice in Nursing and Health Care is a comprehensive and practical resource for all nurses and healthcare practitioners who want to develop person-centred ways of working. This second edition which builds on the original text Person Centred Nursing, has been significantly revised and expanded to provide a timely and topical exploration of an important subject which underpins all nursing and healthcare, edited by internationally renowned experts in the field. Person-centred Practice in Nursing and Health Care looks at the importance of person-centred practice (PCP) from a variety of practice, strategic, and policy angles, exploring how the principles of PCP underpin a variety of perspectives, including within leadership and in the curriculum. The book explores not only a range of methodologies, but also covers a variety of different healthcare settings and contexts, including working within mental health services, acute care, nursing homes, the community, and working with children and people with disabilities. Key features: Significantly updated and expanded since the previous edition, taking into account the considerable changes in recent health care advancements, including the ‘Francis’ report Builds on previous perspectives of person-centredness in nursing and applies them in a broader nursing and health care context Includes a stronger exploration on the role of the service-user Shows the use of life-story and narrative approaches as a way of putting the individual’s identity at the heart of the care relationship Includes learning features such as links to current practice developments and reflective questions

*EBOOK: Person Centred Practice for Professionals* Jan 20 2023 This valuable text offers a range of practical, person centred and evidence based approaches to tackling challenges faced by professionals working with people with learning disabilities. It helps the reader to analyze issues relating to person centred practice and citizenship and considers the implications of this key government initiative for health and social care professionals. The authors aim to support professionals in working through this changing agenda, whilst identifying the interface between their own professional practice and person centred approaches to working with people who have a learning disability. The book includes well referenced practical approaches to the subject area, alongside creative and innovative thinking. In addition, the book also: Explores the historical context of learning disability services and how this has contributed to the development of person centred services Introduces a range of practical person centred thinking tools that can be readily used within professional practice Contains a model to inform the delivery and integration of person centred practice within professional practice Considers the contribution of a range of different professional roles to the person centred and self directed support approach Evaluates the relevance of person centred thinking and planning to people from different cultural backgrounds and those undergoing the transition from adolescence to adulthood Person Centred Practice for Professionals is key reading for students, academics and professionals working or training to work with people with learning disabilities.

**Patient-Centered Medicine** Nov 25 2020 This long awaited Third Edition fully illuminates the patient-centered model of medicine, continuing to provide the foundation for the Patient-Centered Care series. It redefines the principles underpinning the patient-centered method using four major components - clarifying its evolution and consequent development - to bring the reader fully up-to-date. *Generalist Practice* Dec 19 2022 This essential text presents a "task-centered" methodology—a structured, short-term problem-solving approach—applicable across systems at five levels of practice: the individual, the family, the group, organizations, and communities. The second edition offers more information on systems theories and includes case studies and practice questions with each chapter, as well as checklists for each level of practice and exercises to help students monitor their understanding and skill development.

**A Family-centered Approach to People with Mental Retardation** Jun 13 2022 This Innovations title outlines key principles relevant to a family-centered approach to mental retardation and identifies four components to a family-centered practice.

**The Person-Centered Approach** Oct 25 2020 For nearly 50 years the approach of Carl Rogers and his colleagues has been used to help others in counseling, psychotherapy, and education. This project takes that work into the realms of Religion, Politics, Alcohol treatment, Incest, Mental Disabilities, Sandtray therapy, Philosophy, and Person-Centered history & theory.

**Implementing Occupation-centred Practice** Apr 30 2021 This practical text supports occupational therapy students and educators as they navigate the opportunities and challenges of practice learning. Reflecting contemporary and innovative occupation-centred practice, it sets out a step-by-step guide to using this knowledge across a range of settings. The clear structure, templates, examples and strategies it presents demonstrate how contemporary theory can be used to inform and guide practice. *Implementing Occupation-centred Practice* is an essential resource for occupational therapy students during their placement preparation and throughout their placement. It also serves as a tool for practice educators who are looking for assistance in structuring learning for their students.

**Client-Centered Therapy and the Person-Centered Approach** Aug 03 2021 This volume is an important contribution to the current literature on a person-centered approach. It demonstrates the increasingly broad and dynamic application of this perspective to a variety of fields. Of particular interest to family psychologists are the chapters on family relationships, systems theories and marital and family therapy. This book is a valuable addition to the library of seasoned family psychologists as well as beginning graduate students in marriage and family therapy programs. *The Family Psychologist*

**Systems-Centered Practice** May 12 2022 *Systems-Centered Practice* presents a series of papers that trace the development of the theory of living human systems between 1987 and 2002. As the theory develops, so do the methods and techniques that put it into practice. The book also describes in detail the connection between the hierarchy of defence modification and the specific phases of system development that determine readiness for change. The papers in this volume contribute to our knowledge of the permeability of the boundaries between clinical and social psychology through the investigation of living human systems, and of systems-centered group and individual therapy. The author's considerable body of work constitutes a blend of creativity and learning of the highest order.

**Social Work With Older People: Approaches To Person-Centred Practice** May 20 2020 This text fills a gap for an accessible textbook which takes a person-centred approach to working with older people by providing readers with a basic knowledge of policy, legislation, theory and research.

**Counselors at Law** Feb 15 2020

**Person-Centred Practice in Nursing and Health Care** Sep 16 2022 *Person-centred Practice in Nursing and Health Care* is a comprehensive and practical resource for all nurses and healthcare practitioners who want to develop person-centred ways of working. **Hypnotherapy** Jun 01 2021 In this useful resource for clinical hypnotherapists and patients, the author fuses case studies and therapeutic techniques into a fascinating introduction to the practice of hypnotherapy. Illustrations.

**A Systems-Centered Approach to Inpatient Group Psychotherapy** Dec 15 2019 *Systems-centered therapy* is theory driven, therefore every intervention is in fact an hypothesis that tests both the validity of the theory and the reliability of its practice as it applies to short and long-term therapy with individuals, families, couples and groups. This book is built around the transcript of an inpatient therapy session, giving the reader the opportunity to follow verbatim how systems-centered therapy actually works. The script tracks the initial techniques that introduce systems-centered norms to a group. These include encouraging patients to explore their experience instead of explaining it, and to join together in subgroups around the common human resistances that interfere with being able to do therapeutic work. Wherever appropriate, the author annotates the script with the rationale behind a particular method. Other chapters give an overview of the systems-centered ideas, their formulation as a theory of living human systems, and the systems-centered methods of boundarying, vectoring, contextualizing and functional subgrouping that put the theory into practice. Agazarian's book is an important text for all those who are interested in applying systems thinking to therapy, and, with its many practical examples, particularly useful to those who are interested in using systems-centered techniques.

**Reinventing Human Services** Apr 18 2020 Dissatisfaction with a human services system that is unresponsive, stigmatizing, and ineffective has led to a ferment of experimentation in recent years. *Reinventing Human Services* examines the historical and economic context of current efforts to reinvent human services, showing the urgency and the difficulty of the task. It draws on successful examples in Britain, Canada, and the United States to develop a new paradigm for social work practice, one that integrates individual, family, and community levels of practice and reconceptualizes professional-community relations. The interdisciplinary team of authors includes scholars, researchers, and practitioners from the disciplines of economics, urban planning, communications, criminal justice, psychology, marriage and family therapy, education, and social work.

**The Task-centred Book** Aug 23 2020 Peter Marsh and Mark Doel's new book is a radical departure from traditional literature on social work methods. The main reference point is the voice of practitioners, service users and carers, as researched and developed by the authors over twenty years.

**Auditory-verbal Practice** Oct 13 2019 This text is structured to provide the reader with the basics of auditory-verbal practices from a historical perspective, including the knowledge to understand how it evolved to current evidence-based practices. Families who learn that one of its members has a hearing loss will experience varied reactions. To best serve these families, practitioners must provide family assessment, support, and information. The book begins by examining the theoretical and practical bases of family therapy models, and the development of a systemic viewpoint that is crucial to practitioners who must evolve to serve more than just the parent-child dyad. Essential family therapeutic strategies that are needed to effectively work with families are presented, and from an objective perspective, current auditory-verbal practices and various ethical issues are examined. Varied family-based intervention models are discussed, with the family-centered approach considered the ideal to which practitioners aspire. The book explains how the merging of auditory-verbal and systemic family therapy strategies can effectively culminate in the implementation of family-based approaches to intervention. Evidence-based strategies embraced by family therapists and family-centered intervention service providers that can be implemented by auditory-verbal practitioners are shared by a cross-cultural collaboration of contributors to this book. The strategies and discussions contained in this comprehensive resource will be of special interest to speech-language pathologists, educational audiologists, and teachers for children with hearing loss, as well as early intervention service providers and social workers -- Back cover.

**A Practical Guide to Delivering Personalisation** Jan 16 2020 This is the comprehensive guide to delivering personalisation in health and social care using person centred approaches. It covers what personalisation and person centred approaches are, the different elements involved, and how to carry it out with all those receiving care and support, from people with disabilities to people at the end of life.

**Task-centered Practice** Jan 08 2022 Based on the papers of the Conference on applications of task-centered treatment, held at the University of Chicago, 1975.

**Occupation Centred Practice with Children** Aug 15 2022 This book draws on contemporary occupational therapy theory and research to provide occupational therapy students and clinicians with a practical resource on implementing occupation centred practice with children. Each chapter has specific objectives and uses case studies to demonstrate the clinical realities and applications of each of the topics addressed. Best practice guidelines are provided along with a summary of recommendations drawn from the relevant theories, occupational therapy philosophy and existing research. The book aims specifically to be practice based.

**Person-centred Nursing** Oct 17 2022 The concept of 'person-centredness' has become established in approaches to the delivery of healthcare, particularly with nursing, and is embedded in many international healthcare policy frameworks and strategic plans. This book explores person-centred nursing using a framework that has been derived from research and practice. *Person-centred Nursing* is a theoretically rigorous and practically applied text that aims to increase nurses' understanding of the principles and practices of person-centred nursing in a multiprofessional context. It advances new understandings of person-centred nursing concepts and theories through the presentation of an inductively derived and tested framework for person-centred nursing. In addition it explores a variety of strategies for developing person-centred nursing and presents case examples of the concept in action. This is a practical resource for all nurses who want to develop person-centred ways of working.

**The Person-Centred Approach** Mar 10 2022 Peggy Natiello's collection of work has become a favourite amongst students on Person-Centred courses throughout the UK. It is a scholarly, much referenced work on collaborative power and gender issues.

**Pharmaceutical Care Practice: The Patient-Centered Approach to Medication Management, Third Edition** Sep 04 2021 *Pharmaceutical Care Practice, 3e* provides the basic information necessary to establish, support, deliver, and maintain medication management services. This trusted text explains how a practitioner delivers pharmaceutical care services and provides a vision of how these services fit into the evolving healthcare structure. Whether you are a student or a practicing pharmacist seeking to improve your patient-care skills, *Pharmaceutical Care Practice, 3e* provides the step-by-step implementation strategies necessary to practice in this patient-centered environment. This practical guide to providing pharmaceutical care helps you to: Understand your growing role in drug therapy assessment and delivery Learn an effective process for applying your pharmacotherapeutic knowledge to identify and prevent or resolve drug therapy problems Establish a strong therapeutic relationship with your patients Optimize your patients' well-being by achieving therapeutic goals Improve your follow-up evaluation abilities Documents your pharmaceutical care and obtain reimbursement Work collaboratively with other patient care providers The patient-centered approach advocated by the authors, combined with an orderly, logical, rational decision-making process assessing the indication, effectiveness, safety, and convenience of all patient drug therapies will have a measurable positive impact on the outcomes of drug therapy.

**Learner-Centered Teaching** Apr 11 2022 In this much needed resource, Maryellen Weimer-one of the nation's most highly regarded authorities on effective college teaching-offers a

comprehensive work on the topic of learner-centered teaching in the college and university classroom. As the author explains, learner-centered teaching focuses attention on what the student is learning, how the student is learning, the conditions under which the student is learning, whether the student is retaining and applying the learning, and how current learning positions the student for future learning. To help educators accomplish the goals of learner-centered teaching, this important book presents the meaning, practice, and ramifications of the learner-centered approach, and how this approach transforms the college classroom environment. *Learner-Centered Teaching* shows how to tie teaching and curriculum to the process and objectives of learning rather than to the content delivery alone.

**Person-centered Care in Practice** Feb 09 2022 "Based on the authors' decade-long partnership of research and real-world experience in an elder and dementia care facility, the book describes their innovative, multidimensional model and process of change. An implementation action plan outlines nine basic strategies for getting started with person-centered care. A Toolkit with two dozen operational tools helps you assess your progress in incorporating person-centered care into your practice as you transform your setting for elders and persons with dementia. Clear directions for using each tool will help you navigate the road to culture change in your facility."--publisher website.

*A Person-Centered Approach and the Rogerian Tradition* Mar 30 2021 From the Book: "it is hypothesized that the therapist wants to understand for no other reason but to understand. If the therapist is motivated to understand solely to be a change agent for the client, then the facilitative mechanisms may not be sufficient because a tendency toward unconditional acceptance will not effectively emerge." "the published literature in the 1970s suggests that person-centered therapy (PCT) researchers, rather than pursuing novel avenues of empirical inquiry, devoted substantial time in defending PCT against - what now appear to be - unfounded claims made by a group of social scientists who held significant professional interest in seeing through the dismantling of the person-centered approach." Book Summary: This book is about a person-centered approach to counseling and psychotherapy as developed by the psychologist Carl Rogers (1902-1987) and his colleagues. In addition, this book is also intended to be a handbook on the person-centered approach and the Rogerian tradition for use in academic and non-academic settings alike. Each chapter is briefly summarized below. Chapter 1 ("A Person-Centered Approach and the Structure of Scientific Revolutions") examines the trend of scientific inquiry in psychotherapy research, specifically focusing on events and changes that took place beginning in the 1970s and are argued to have substantially influenced the direction of psychotherapy research in the following decades. In particular, these changes are suggested to have been guided by the choices made by a small but influential group of behavior and psychoanalytic-oriented researchers, which arguably led to changes in the scientific methods used to investigate the effectiveness of psychotherapeutic treatments; and, as will be shown in this chapter, led to the decline and disappearance of Carl Rogers's person-centered approach. This chapter suggests that through a method of allegiance-guided scientific inquiry, the Rogerian tradition was systematically dismantled by a group of social scientists that held considerable professional interests to do so. Chapter 2 ("A Person-Centered Approach to Multicultural Counseling Competence") examines current and historical trends in psychotherapy research and practice with racial/ethnic minority populations. Using psychotherapy evidence from both the latter half of the 20th century and the initial decades of the 21st century, cultural adaptations to previously hypothesized person-centered therapy mechanisms of change are proposed. Chapter 3 ("A Person-Centered Approach to the Treatment of Borderline Personality Disorder") addresses psychotherapy with a person described as possessing a borderline personality disorder (BPD). In particular, a selection of mainstream approaches is reviewed to examine unique and universal aspects of current thinking about this treatment population. Following this review, an expanded analysis of person-centered therapy is offered, examining current research evidence and the mechanisms of change hypothesized to occur in the person-centered treatment of BPD. Chapter 4 ("A Person-Centered Approach to the Treatment of Combat Veterans with Posttraumatic Stress Disorder") examines posttraumatic stress disorder through the lens of military combat trauma that results in a breakdown of a combat veteran's sense of self and the world. In the effective treatment of combat-related posttraumatic stress disorder, a therapist must help the veteran reorganize the self-structure that has become incongruent with his or her precombat-trauma self following his or her return home from war. For the therapist to facilitate a veteran's becoming whole, he or she must be genuinely congruent in the relationship.

**Evaluation of the Department of Veterans Affairs Mental Health Services** Nov 13 2019 Approximately 4 million U.S. service members took part in the wars in Afghanistan and Iraq. Shortly after troops started returning from their deployments, some active-duty service members and veterans began experiencing mental health problems. Given the stressors associated with war, it is not surprising that some service members developed such mental health conditions as posttraumatic stress disorder, depression, and substance use disorder. Subsequent epidemiologic studies conducted on military and veteran populations that served in the operations in Afghanistan and Iraq provided scientific evidence that those who fought were in fact being diagnosed with mental illnesses and experiencing mental health-related outcomes in particular, suicide at a higher rate than the general population. This report provides a comprehensive assessment of the quality, capacity, and access to mental health care services for veterans who served in the Armed Forces in Operation Enduring Freedom/Operation Iraqi Freedom/Operation New Dawn. It includes an analysis of not only the quality and capacity of mental health care services within the Department of Veterans Affairs, but also barriers faced by patients in utilizing those services.

**Child-Centered Play Therapy** Dec 27 2020 Highly practical, instructive, and authoritative, this book vividly describes how to conduct child-centered play therapy. The authors are master clinicians who explain core therapeutic principles and techniques, using rich case material to illustrate treatment of a wide range of difficulties. The focus is on nondirective interventions that allow children to freely express their feelings and take the lead in solving their own problems. Flexible yet systematic guidelines are provided for setting up a playroom; structuring sessions; understanding and responding empathically to children's play themes, including how to handle challenging behaviors; and collaborating effectively with parents.
