The Glycemic Load Counter Feb 26 2021 YOUR COMPLETE POCKET GUIDE TO GL VALUES Based on the proven science of the Glycemic Index (GI) but easier to use, Glycemic Load (GL) dieting is the easiest, most powerful tool for losing weight, controlling diabetes and following a healthy day-to-day diet. GL values give a more accurate measure of the way different foods affect your body by adjusting the GI score for portion size. For example, an orange is a much healthier snack than a candy bar, but the orange has a higher GI value (42) than the candy bar (41). But when adjusted to the real-world portion, the healthier snack becomes obvious--the orange has a low GL value of 4 compared to the high GL value of 26 for the candy bar! \*GL, GI Plus calories, carbs and fat for over 800 popular foods. \*User-friendly Convenient design and straightforward A to Z lists \*No more math Each food's serving size is already computed into the GL score \*Glycemic Response Advice on different types of foods and your body's reaction to each one, from meats and vegetables to breads and fruits.

Trade World Saga Jun 01 2021 This is the complete TRADE WORLD SERIES -- all four (4) novels (780 pages) in one. (Re-edited) Amazon Reviewer - Had I known how much I would enjoy this I would have paid double! Amazon Reviewer - Engrossing tale that I could not put down. Amazon Reviewer - Wow. Long but a good read MANUAL INTERPRETATION - Rett didn't expect to be rescued and then attacked by a primitive on a test flight. Andrew didn't expect to save an alien and nearly destroy his planet because of what he learned. Earth didn't get to choose their representative for a planet-wide treaty and then be threatened by an alien confederation. Surely Earth couldn't defend itself. Surely we couldn't have had contact with others, from off-planet, before now...but what was this backwater planet doing with a fleet of ships, advanced navigation systems and a galactic-class trading facility with personnel who spoke all the major galactic languages. Every species got it wrong. We were just trying to fit to follow the manual. PATENTLY OBVIOUS - Earth is venturing out into space with technology adapted from aliens. We have no clue on how to trade and which planets are occupied and which are vacant. How will we move out into the void when there is political sniping at home? How do you convince the public it is a good thing when they don't believe they really exist? Aliens are headed to Earth. What do we trade? What will we ask in return? How do we handle intellectual property off planet? Every technology -- every trade good is fair game. This is about Earth going through its growing pains and being tested at every turn. Earth has a lot of growing up to do and it isn't all fun and games...it is a test we have to pass... A CERTAIN EXPERTISE - shows our young race suddenly moving into deep space. Empires had existed before us but we had come from the fringe of the galaxy and the older races were near the core. Some races progressed slowly even though they were much older due to their bureaucracy. Others appeared and disappeared in the blink of an eye. We were currently leaving a mark on our galactic arm through our trade and rediscovered ancient technology but we really don't have a clue. We have overcome local competition and are probing deeper toward our galaxy Core. We are searching for the creators of the molecular circuitry that can improve electronics or form intelligent machines. We are also, struggling with our humanity and facing political jockeying at home due to radical changes in longevity, energy availability, and mobility. New power sources and alien influences may be a bit much for Earth should we even survive the tourists and traders. The more advanced species that are further inward on the spiral arm are another kettle of fish altogether. CORE VALUES - Earth and the Exploration Service destroyed the bulk of the Allung slave traders. New transition technology lets them travel thousands of light years instantly and they've seized accumulated positional data (charts) from the Allung Confederation. The Earthers are traveling closer to the galactic core where the Allung may have run into the Ylee, the possible creators of the lamlee. The Ylee region of space is close to LeiLei and Shiv's home world and we will go there first. Earth wishes to expand: explore, and tame further systems near the core. They have to decide what type of expedition to form - do they need a lone ship, a squad or an armada. Earth has had opposition at every step of their travels and many groups on Earth are finding the means to look for a future, an escape into space. Earth may not survive its successful trading...is trade worth five billion human lives? Looks like we have no choice...

Burning Chrome Apr 30 2021 Tautly written and suspenseful, "Burning Chrome" collects ten of Gibson's short stories with a Preface from Bruce Sterling, now available for the first time in trade paperback.

**Radar Instruction Manual** Jan 16 2020 Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was

later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs

*A Therapist Survey of Evidence-based Practices in Publicly Funded Youth Mental Health* Sep 04 2021 Publicly funded services, such as Medicaid, account for close to half of all youth mental health (MH) services in the U.S. (Buck, 2003; Mark et al., 2007; Pires, 2013). Outcome studies of treatment as usual (TAU), particularly within publicly funded youth MH service systems, have demonstrated variable effects, with average effect sizes close to zero (Bickman et al., 2000; Garland, Bickman & Chorpita, 2010; Zima et al., 2005; Weisz et al., 2017). This contrasts with the medium to large average effect sizes in controlled clinical trials for evidence-based treatments (EBTs) for youth MH problems (Weisz, Jensen-Doss & Hawley, 2006). One potential reason for this discrepancy may be

that therapists within TAU contexts are not implementing EBTs. To date, few studies have examined use of specific treatment strategies, whether evidence-based or not, in these settings. In a statewide survey of therapists providing youth MH care funded by Medicaid and the State Child Health Insurance Program (S-CHIP), 780 therapists reported on their use of treatment strategies with a recent, representative youth case presenting with primary anxiety, depression, or conduct problems. Therapists reported using a wide range of treatment strategies, but showed a preference for implementing transdiagnostic EBT strategies over both (a) EBT strategies specific to a particular patient presentation (e.g., exposure for anxiety) and (b) strategies without a strong evidence base (e.g., pleasant activity scheduling for conduct problems). We examined multiple therapist (e.g., theoretical orientation, treatment manual use, discipline), organizational setting, and client level (e.g., age) predictors of EBT use. Provider treatment manual use, perceived efficacy in treatment, learning theory orientation, private practice setting, younger client age, and longer time since degree completion predicted more frequent implementation of EBT strategies. We discuss how such features may be targeted in future training and implementation efforts in order to increase EBT use within publicly funded youth MH service contexts.

Dare to Live Healed Apr 18 2020 If you want to live a healed life then Dare to Live Healed is a book that you should have in your hand. Within the pages of this book you will find God's Word on healing. You will find encouragement for you to actively participate in the healing of your body. God loves each of us and He has already provided for us to be healed through those lashes that Jesus received in His body. Healing is God's Provision for all who will say it, believe it, and receive it. After you get healed go tell someone about it.

This Close to Happy Jul 22 2020 A New York Times Book Review Favorite Read of 2016 “Despair is always described as dull,” writes Daphne Merkin, “when the truth is that despair has a light all its own, a lunar glow, the color of mottled silver.” This Close to Happy—Merkin’s rare, vividly personal account of what it feels like to suffer from clinical depression—captures this strange light. Daphne Merkin has been hospitalized three times: first, in grade school, for childhood depression; years later, after her daughter was born, for severe postpartum depression; and later still, after her mother died, for obsessive suicidal thinking. Recounting this series of hospitalizations, as well as her visits to myriad therapists and psychopharmacologists, Merkin fearlessly offers what the child psychiatrist Harold Koplewicz calls “the inside view of navigating a chronic psychiatric illness to a realistic outcome.” The arc of Merkin’s affliction is lifelong, beginning in a childhood largely bereft of love and stretching into the present, where Merkin lives a high-functioning life and her depression is manageable, if not “cured.” “The opposite of depression,” she writes with characteristic insight, “is not a state of unimaginable happiness . . . but a state of relative all-right-ness.” In this dark yet vital memoir, Merkin

describes not only the harrowing sorrow that she has known all her life, but also her early, redemptive love of reading and gradual emergence as a writer. Written with an acute understanding of the ways in which her condition has evolved as well as affected those around her, *This Close to Happy* is an utterly candid coming-to-terms with an illness that many share but few talk about, one that remains shrouded in stigma. In the words of the distinguished psychologist Carol Gilligan, “It brings a stunningly perceptive voice into the forefront of the conversation about depression, one that is both reassuring and revelatory.”

**Tsung-mi and the Sinification of Buddhism** Jul 02 2021 Honored as a patriarch in both the Ch'an and Hua-yen schools of medieval Chinese Buddhism, Kuei-feng Tsung-mi (780-841) was a key thinker in a period of intellectual ferment giving way to new, uniquely Chinese forms of religion. Beginning with a detailed discussion of Tsung-mi's life and times, Peter Gregory analyzes his thought within the context of T'ang dynasty Buddhism and Chinese intellectual history. Tsung-mi's reformulations of Buddhist doctrine within the Ch'an and Hua-yen schools and his incorporation of elements from Confucianism are shown as having led to a truly integrative and comprehensive framework of thought, one in which all religious values can be seen to inform one another. Gregory maintains that Tsung-mi's reformulation of Hua-yen can be understood only by relating it to his involvement with and reaction to the various movements within the Ch'an of his day. He then examines Tsung-mi's analysis of Ch'an, which is characterized by the thinker's strong reaction against the antinomian interpretations of Ch'an advocated in some of the school's more radical strands. The moral tenor of these writings suggests the formative influence that Tsung-mi's early study of Confucian texts had on his overall orientation.

*Disciplined Entrepreneurship* Aug 23 2020 24 Steps to Success! *Disciplined Entrepreneurship* will change the way you think about starting a company. Many believe that entrepreneurship cannot be taught, but great entrepreneurs aren't born with something special – they simply make great products. This book will show you how to create a successful startup through developing an innovative product. It breaks down the necessary processes into an integrated, comprehensive, and proven 24-step framework that any industrious person can learn and apply. You will learn: Why the “F” word – focus – is crucial to a startup's success Common obstacles that entrepreneurs face – and how to overcome them How to use innovation to stand out in the crowd – it's not just about technology Whether you're a first-time or repeat entrepreneur, *Disciplined Entrepreneurship* gives you the tools you need to improve your odds of making a product people want. Author Bill Aulet is the managing director of the Martin Trust Center for MIT Entrepreneurship as well as a senior lecturer at the MIT Sloan School of Management. For more please visit <http://disciplinedentrepreneurship.com/>

Cool French Cooking: Fun and Tasty Recipes for Kids Dec 27 2020 Give up-and-coming chefs a chance to explore the foods of France! *Cool French Cooking* introduces readers to world geography and authentic, easy-to-make recipes that taste great. Cooking

teaches kids about food, math and measuring, and following directions. Each kid-tested recipe includes step-by-step instructions and how-to photos. Tools and ingredients lists are also provided, as well as pronunciation guides when needed. So grab an apron and prepare for a tasty adventure! Checkerboard Library is an imprint of ABDO Publishing Company.
