suggestions for direct classroom and library connections"-- arts and philosophy What really happened after Acts? If you've ever wondered what happened to the biblical characters after Acts—from the well-known Matthew to the lesser-known Bartholomew—then this book is for you. Join Dr. Bryan Litfin as he guides you through Scripture and other ancient literature to sift fact from fiction, real-life from legend. Skillfully researched and clearly written, *After Acts* is as accurate as it is engaging. Gain a window into the religious milieu of the ancient and medieval church. Unearth artifacts and burial sites. Learn what really happened to your favorite characters and what you should truly remember them for. Did Paul ever make it to Spain? Was he beheaded in Rome? Is it true that Peter was crucified upside down? Was the Virgin Mary really bodily assumed into heaven? The book of Acts ends at chapter 28. But its characters lived on. Philosophers, historians, ethicists, and theologians provide the perspectives of their fields on astrobiology for graduate students and researchers. Could our memories of past-life experiences offer a key to unlocking the mysteries and questions we struggle with today? According to Dr. Roger Woolger, the answer is yes—and anyone can learn to explore these extraordinary memories to retrieve valuable healing insights. With *Healing Your Past Lives*, Woolger gathers together an astonishing two decades of research that he has conducted with hundreds of patients, to offer a clear account of past lives—including many specific techniques to begin investigating them. Readers join Woolger to discover: How past-life memories can help resolve cases of depression, anxiety, and other inexplicable symptoms World teachings and clinical evidence on past lives Six guided past-life practices on CD, and much more This book recounts the life stories - stories of loss and hope, of anxieties and aspirations - of generations of exiled Tibetans living in India since the late 1950s after the Chinese takeover of Tibet. Located in the realm of psycho-historical analysis, this work has a dual focus in interpreting and analyzing these life stories. First, a consistent effort is made to unravel the psychologically devastating consequences following refugeehood and torture. A simultaneous focus searches for symbols of human resilience - the opening up of creative possibilities and a return to renewed meanings in the lives of these exiles. Two central symbols of continuity among this community which are discussed are the Dalai Lama and the philosophy of Buddhism. This is a unique book that looks at issues of contemporary interest and relevance to the Tibetan community today, providing a different view of their 'place' in the wider political sphere. *Lives in Exile - Exploring the World of Tibetan Refugees* will be of interest to scholars in the fields of psychology, history, and refugee studies and to the general reader. Where did we come from? Are we alone? Where are we going? These are the questions that define the field of astrobiology. New discoveries about life on Earth, the increasing numbers of extrasolar planets being identified, and the technologies being developed to locate and characterize Earth-like planets around other stars are continually challenging our views of nature and our connection to the rest of the universe. In this book, philosophers, historians, ethicists, and theologians provide the perspectives of their fields on the research and discoveries of astrobiology. A valuable resource for graduate students and researchers, the book provides an introduction to astrobiology, and explores subjects such as the implications of current origin of life research, the possible discovery of extraterrestrial microbial life, and the possibility of altering the environment of Mars. "This book is for teachers who have good days and bad

— and whose bad days bring the suffering that comes only from something one loves. It is for teachers who refuse to harden their hearts, because they love learners, learning, and the teaching life." — Parker J. Palmer [from the Introduction] For many years, Parker Palmer has worked on behalf of teachers and others who choose their vocations for reasons of the heart but may lose heart because of the troubled, sometimes toxic systems in which they work. Hundreds of thousands of readers have benefited from his approach in **THE COURAGE TO TEACH**, which takes teachers on an inner journey toward reconnecting with themselves, their students, their colleagues, and their vocations, and reclaiming their passion for one of the most challenging and important of human endeavors. This book builds on a simple premise: good teaching cannot be reduced to technique but is rooted in the identity and integrity of the teacher. Good teaching takes myriad forms but good teachers share one trait: they are authentically present in the classroom, in community with their students and their subject. They possess "a capacity for connectedness" and are able to weave a complex web of connections between themselves, their subjects, and their students, helping their students weave a world for themselves. The connections made by good teachers are held not in their methods but in their hearts — the place where intellect, emotion, spirit, and will converge in the human self — supported by the community that emerges among us when we choose to live authentic lives. **BONUS:** Includes an audio CD featuring a 45-minute conversation between Parker Palmer and his colleagues, Marcy Jackson and Estrus Tucker from the Center for Courage & Renewal. They reflect on what they have learned from working with thousands of teachers in their "Courage to Teach" program (www.CourageRenewal.org) and with others who yearn for greater integrity in their professional lives. **Note:** CD-ROM/DVD and other supplementary materials are not included as part of eBook file. Looks at the ideas of C.S. Lewis on the meaning of life, friendship, the importance of stories, the Christian life, the art of apologetics, education, suffering, and heaven. The *Parallel Lives of Plutarch* (c. AD 45-120), a vast retrospective series of biographies of Greek and Roman statesmen, have always been one of the most widely read of the works which survive from classical antiquity. They were written when Roman imperial power was reaching its height, and are sophisticated examples of a renaissance classicism - linguistic, literary, philosophical and historical - which formed a Greek reaction to Roman domination. The *Parallel Lives* thus offer us a unique insight into the reception of Classical Greece and Republican Rome in the Greek world of the second century AD. They also explore and challenge issues of psychology, education, morality, and cultural identity. In this new study discussions of Plutarch's literary techniques and moral conceptions are combined with case studies of a number of paired Lives (Pyrrhos - Marius, Phokion - Cato Minor, Lysander - Sulla, and Coriolanus - Alkibiades). As the author demonstrates, the parallel structure of the Lives is not only vital to their interpretation but also reflects a Greek attempt to appropriate and make sense of the pasts of both Greece and Rome. **SUMMARY:** The nativity story as told by the angel Gabriel gives the prophetic account of the life and ministry of Jesus before His birth. It came to fulfill the prophecies of Isaiah and Micah rendered 750 years earlier. The story has a very strident anti-abortion message since at the time of the annunciation Mary had not yet said yes to the angel Gabriel and God. All the events in the life of Jesus were already spelled out and so it was for John the Baptist, Jeremiah and for all of us. It is

from that encounter and other texts, we know that life begins when God speaks it forth because His Word is spirit and life and not the prerogative of anyone not the least the Pro-lifers or those of Pro-choice. This work looks at the politics of choice; discusses when life begins and chronicles the landmark Supreme Court decision, Roe v. Wade, in 1973 that ushered in the current law of the land, which has led to the legalization of abortion as the law of the land in America.

"In this briefer, streamlined edition of *Sociology: Exploring the Architecture of Everyday Life*, David Newman's goal is the same: to write a textbook that "reads like a real book." The author show students how to see the "unfamiliar in the familiar"-to step back and see organization and predictability in their take-for-granted personal experiences. Newman uses the metaphors of "architecture" and "construction," to help students understand that society is not something that exists "out there," independently of themselves; it is a human creation that is planned, maintained, or altered by individuals. Instead of surveying every subfield in sociology, the more streamlined coverage focuses on the individual and society, the construction of self and society, and social inequality in the context of social structures. Adapted from David Newman's *Sociology: 13E*, the Brief Edition is 1/3 shorter. The main differences are: -fewer examples -no "Micro-Macro Connection" boxes -some photos and art have been eliminated -different format (smaller trim, 1-color, different interior template)"-- Much more than just an anthology, this survey of humanity's search for the meaning of life includes the latest contributions to the debate, a judicious selection of key canonical essays, and insightful commentary by internationally respected philosophers. Cutting-edge viewpoint features the most recent contributions to the debate Extensive general introduction offers unprecedented context Leading contemporary philosophers provide insightful introductions to each section This volume is based on feminist qualitative research with older women, contextualised within current literature & debates in the field of social gerontology. The authors provide an overview of current knowledge & understanding about the circumstances & experiences of older people in relation to gender & ethnicity. A long time ago, no one knows quite when, a young man with an adventurous spirit but very innocent to the ways of the world was seduced by Old

Whore Life. She became pregnant and gave birth to a male child, whom she named Murphy. Born of innocence and deception, Murphy was not a normal child. Cursed with his mother's insatiable desire to deceive the world and blessed with his father's guileless nature, Old Whore Life weaned her favorite child for his destined purpose to test the spirit of man with what over time came to be known as "Murphy's Law," and so it came to pass that regardless of what we do in life if anything can go wrong, it will... Murder is often regarded as both the 'ultimate' and a unique crime, and whereas courts are normally given discretion in sentencing offenders, for murder the sentence is mandatory – indeterminate imprisonment. Since the crime and the punishment come as a 'package deal' this book looks at both the legal nature of the offence and at the current operation of the mandatory life sentence. Not only does the book adopt a critical approach, by assessing the strengths and weaknesses of the status quo, it also draws upon comparative material from both common and civil law jurisdictions in an attempt to provide a comprehensive exploration of these issues. The need for public confidence in the criminal justice system is particularly acute in the way it deals with the most serious homicides. In this book the authors report findings from the first systematic exploration of public attitudes to sentencing murder in this or any other common law jurisdiction. The picture of public opinion emerging from this recent large-scale nationwide qualitative and quantitative survey, funded by the Nuffield Foundation, is likely to surprise many, and will be of interest to all jurisdictions where the mandatory life sentence for murder has been questioned. It's the subject of much-shared articles and popular relationship guides. Why is this fifty-year-old theory, widely accepted in psychological circles, suddenly in vogue? Because people are discovering how powerfully it sheds light on who we love--and how. Fascinated by the subject, award-winning journalist and author Peter Lovenheim embarked on a journey to understand it from the inside out. Interviewing researchers, professors, counselors, and other experts, as well as individuals and couples whose attachment stories illuminate and embody the theory's key concepts. This book follows the fascinating story of four great men whom God used to begin a process that would eventually culminate in the Messiah, Jesus Christ.
