Manuals Combined: U.S. Marine Corps Basic Reconnaissance Course (BRC) References Jan 31 2021 Over 5,300 total pages MARINE RECON Reconnaissance units are the commander's eyes and ears on the battlefield. They are task organized as a highly trained six man team capable of conducting specific missions behind enemy lines. Employed as part of the Marine

Air- Ground Task Force, reconnaissance teams provide timely information to the supported commander to shape and influence the battlefield. The varying types of missions a Reconnaissance team conduct depends on how deep in the battle space they are operating. Division Reconnaissance units support the close and distant battlespace, while Force Reconnaissance units conduct deep reconnaissance in support of a landing force. Common missions include, but are not limited to: Plan, coordinate, and conduct amphibious-ground reconnaissance and surveillance to observe, identify, and report enemy activity, and collect other information of military significance. Conduct specialized surveying to include: underwater reconnaissance and/or demolitions, beach permeability and topography, routes, bridges, structures, urban/rural areas, helicopter landing zones (LZ), parachute drop zones (DZ), aircraft forward operating sites, and mechanized reconnaissance missions. When properly task organized with other forces, equipment or personnel, assist in specialized engineer, radio, and other special reconnaissance missions. Infiltrate mission areas by necessary means to include: surface, subsurface and airborne operations. Conduct Initial Terminal Guidance (ITG) for helicopters, landing craft, parachutists, air-delivery, and re-supply. Designate and engage selected targets with organic weapons and force fires to support battlespace shaping. This includes designation and terminal guidance of precision-guided munitions. Conduct post-strike reconnaissance to determine and report battle damage assessment on a specified target or area. Conduct limited scale raids and ambushes. Just a SAMPLE of the included publications: BASIC RECONNAISSANCE COURSE PREPARATION GUIDE RECONNAISSANCE (RECON) TRAINING AND READINESS (T&R) MANUAL RECONNAISSANCE REPORTS GUIDE GROUND RECONNAISSANCE OPERATIONS GROUND COMBAT OPERATIONS Supporting Arms Observer, Spotter and Controller DEEP AIR SUPPORT SCOUTING AND PATROLLING Civil Affairs Tactics, Techniques, and Procedures MAGTF Intelligence Production and Analysis Counterintelligence Close Air Support Military Operations on Urbanized Terrain (MOUT) Convoy Operations Handbook TRAINING SUPPORT PACKAGE FOR: CONVOY SURVIVABILITY Convoy Operations Battle Book Tactics, Techniques, and Procedures for Training, Planning and Executing Convoy Operations Urban Attacks

Handbook for Marine Radio Communication Jul 17 2022 Now in its seventh edition, this bestselling Handbook for Marine

Radio Communication provides an incomparable reference source for all vessels using maritime radio communication systems, which are now a legislative requirement. It includes exhaustive coverage of all UK and international regulations relating to modern maritime communications, such as the crucial GMDSS, all contained within one singular volume. This edition has been fully updated to account for recent major developments in the field. The authors deliver an authoritative guide to the complicated and changing world of radio communications, including:

- Information reflecting ITU Radio Regulations 2020
- Impending modernisation of the GMDSS
- Radical changes to maritime satellite communications and associated distress and safety services
- Introduction of VHF data exchange system (VDES) to supplement coastal AIS services
- Introduction of navigational data (NAVDAT) to supplement NAVTEX services
- Improvements to COSPAS/SARSAT systems
- Introduction of AIS facility to EPIRBs
- Automatic link establishment (ALE) on HF bands
- Updating of global navigation satellite systems (GNSS)
- UK explanatory memorandum to the Merchant Shipping (Radiocommunications) (Amendment) Regulations 2021.

This is a definitive guide for today's maritime communications industry, including ship owners, ship managers, coast guards, seafarers, students of maritime communications, as well as the recreational sector.

The Complete Marine Radio Control Manual Dec 22 2022 Now in paperback, this popular manual thoroughly explains all the technical details modelers need to fit and operate model boats with the sophisticated radio control equipment now on the market. Author Hugh Bright first details the equipment needed--transmitters and receivers, servos and electric motors, batteries, and other power supplies--and then explains how their equipment can be modified and employed to serve various functions. Whether a modeler wants to simply propel a small tug or add fire-fighting equipment, control the braces of a five-masted barque or fire the torpedoes of a model U-boat, the techniques for installing, modifying, and operating the necessary equipment are fully explained. Filled with more than one hundred fifty illustrations, this book is a must for all working model shipwrights.

Reeds VHF Handbook Feb 12 2022 The Reeds VHF Handbook is an accessible, user friendly but comprehensive guide to marine VHF radio that helps users quickly get up to speed with all the functions on their equipment. Straightforward explanations and tips describe the leisure VHF DSC radio system in detail and its place within GMDSS. This brand new book incorporates all the information required to pass the Short Range Certificate, which is compulsory for anyone using a VHF DSC radio, and forms part of the process of obtaining the Day Skipper qualification. The book covers radio procedure, channel allocation, VHF radio theory and more, along with a full explanation of GMDSS, including details on EPIRBs, SARTs and Navtex. The Reeds VHF Handbook is an essential onboard reference, and set to become the standard work on the subject.

GMDSS May 23 2020 The Global Maritime Distress and Safety System (GMDSS) - the maritime equivalent to the emergency

services number - provides a fast and efficient way of calling for assistance at sea, whatever the size of craft or its location. Denise Bréhaut explains the operation of the system as a whole and clearly outlines the procedures required to get help quickly, as well as covering the syllabi of the General Operator's Certificate (GOC), the Long Range Certificate (LRC) and the Restricted Operator's Certificate (ROC). Concise descriptions of channel usage, call signs, types of transmission and equipment allow novices as well as long-time users to thoroughly understand this life-saving communications system. The 6th edition of GMDSS incorporates all the changes to the regulations that came into force in 2009 as well as the 2016 system updates. GMDSS: A User's Handbook has proved an invaluable reference for exam candidates and equipment users alike for almost 20 years - it is the GMDSS bible. The clear and lucid text is supported with illustrations, handy Q&A sections and a quick-reference revision guide for GOC and LRC students. Since it was first published, this book has helped explain the system for anyone using GMDSS and has been excellent pre-course reading for students.
