Florian et Michael Quistrebert (English edition) Feb 13 2020 In their works, mingling colours, light, mass and illusions, Florian and Michael Quistrebert play back the main motifs of modern art, while perverting them, through a particular approach to matter. At the Palais de Tokyo, they are deploying a vast optical theatre in which experience of their paintings and videos is disturbed by the glittering and internal motions of objects. The Quistrebert brothers' ambiguous pieces evoke the impossibility of grasping a painting. Their pictures are never what they show or, rather, never stabilize themselves around their subjects. The artists explore perception by handling it in various ways, which can be intellectual, optical, symbolic or else occult. Book contents - "Trance, Meditation, Madness": An essay by Khairudin Hori, cocurator of Florian & Michael Quistrebert's solo show at the Palais de Tokyo. - "Turbulent Infinities": An essay by Hugo Vitrani, cocurator of Florian & Michael Quistrebert's solo show at the Palais de Tokyo. - "The Substance of Painting is Light": A conversation between Florian & Michael Quistrebert and Mara Hoberman. - Notes on a selection of the artists's works. About the authors: - Khairuddin Hori is the deputy director of artistic programmes at the Palais de Tokyo. - Hugo Vitrani contributes to Mediapart and Beaux-Arts Magazine. He is the curator of the Palais de Tokyo's urban art programme. - Mara Hoberman is a freelance curator and a writer. Book published on the occasion of Florian & Michael Quistrebert's solo exhibition at the Palais de Tokyo, "The Light of the Light," 19.02 – 16.05 2016

Insider Guide to Easy Car Buying: Spend a Tenner Save a Grand Apr 16 2020 Tony Willard has been--amongst many other things in motor publishing motoring correspondent of the Birmingham Evening Mail and Editor of Automotive Management (now called AM)--the best read trade paper for the motor retail trade. There are now stacks of ways to buy cars in the UK. So many that it is really hard for consumers to know where to get best choice, best value, best service, best after-care, best credit or whatever it is that they prioritise. In addition to franchised dealers there are: manufacturers selling direct to the public; rental car companies doing the same; car-buying agents; car supermarkets; used car dealers; internet traders; importers; auctions; and personal shoppers. Most car buying guides concentrate on WHAT to buy whether it be new or used. This book covers that, but assumes the buyer knows roughly what he wants. What has been missing until now is a guide through the jungle of places and prices which tells you WHERE to buy and HOW to pay not a penny more than necessary.

Designing Motion Oct 11 2019 The chaise-longue by Le Corbusier, the radio by Rams, the chair by Eames – designers make

things into cult objects and become icons themselves. But who knows which coupé was designed by Frua, which limousine by Engel, which station wagon by Opron? For a long time, car design was considered to be anonymous, the designers stood in the shadow of the perception of the design, even though their designs can be found on the roads in millions. This richly illustrated book captures the origin of a profession and maps the development of car design based on a comprehensive introduction and the career biographies of over 200 selected designers who contributed to the design of cars and many different associated products in the USA, Europe, and Japan between 1900 and 2000.

The Car Show Jan 26 2021 This e-book details the most interesting and important characteristics of the automobiles, car maintenance, styling features, car body style, the standard classification of the cars, an history of the automobiles, introduction in the automotive industry, and the traffic code, rules and signs. An automobile, usually called a car (an old word for carriage) or a truck, is a wheeled vehicle that carries its own engine. Older terms include horseless carriage and motor car, with "motor" referring to what is now usually called the engine. It has seats for the driver and, almost without exception, for at least one passenger. The automobile was hailed as an environmental improvement over horses when it was first introduced. Before its introduction, in New York City, over 10,000 tons of manure had to be removed from the streets daily. However, in 2006 the automobile is one of the primary sources of worldwide air pollution and cause of substantial noise and health effects.

Citroen Jun 30 2021 In this new view of the Citroen story, automotive/aviation writer and design specialist Lance Cole investigates not just the details of the cars of Citroen, but the aeronautical and cultural origins that lay behind Citroen's form and function. The book digs deep into the ethos of Automobiles Citroen to create a narrative on one of the greatest car manufacturers in history. Using interviews, translations, archive documents and specially-commissioned photographs, the Citroen journey is cast in a fresh perspective. It explains in detail the influences upon Citroen design: Voisin, Lefebvre, Bertoni, Boulanger, Mages, Opron and recent Citroen designers such as Coco, Blakeslee and Soubirou. As well as all the men of the great period of 1920s-1970s expansion, it also cites less well-known names of Citroen's French engineering, design, and influence such as Cayla, Gerin, Giret, Harmand, Dargent and others, to give a full picture of Citroen heritage. The book provides in-depth analysis of all major Citroen models with an engineering and design focus and profiles key individuals and cars up to the present day and Citroen's 'DS'-branded resurgence. It features many newly commissioned photographs, rare archive drawings and interviews with Citroen owners. Researched amongst leading Citroen experts and restorers, Lance Cole provides a fresh perspective on the Citroen car manufacturer, its design language and the legacy of its extraordinary engineering which will be of great interest to all Citroen and motoring enthusiasts. Superbly illustrated with 329 colour photographs, many newly commissioned along with rare archive drawings.

The Automotive Industry and European Integration Dec 05 2021 This book chronicles the divergent growth trends in car production in Belgium and Spain. It delves into how European integration, high wages, and the demise of GM and Ford led to plant closings in Belgium. Next, it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry. Finally, it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years. In sum, this book utilizes history to help expand the knowledge of scholars and policymakers regarding how

European integration and Brexit may impact future auto industry investment for all EU nations.

Car Aug 21 2020 From the first motor cars and classic cars to today's supercars and Formula 1, this is the ultimate book about the history of the car. Packed with stunning photography, and featuring more than 2,000 cars, Car shows you how cars have evolved around the world over the last 130 years, and their impact on society as objects of curiosity, symbols of status and luxury, and items of necessity. Barthes' "Mythologies" Today Apr 09 2022 This is Barthes' seminal text reimagined in a contemporary context by contemporary academics. Through a revisiting of Mythologies, a key text in cultural and media studies, this volume explores the value these disciplines can add to an understanding of contemporary society and culture. Leading academics in media, English, education, and cultural studies here are tasked with identifying the "new mythologies" some fifty or so years on from Barthes' original interventions. The contributions in this volume, then, are readings of contemporary culture, each engaging with a cultural event, practice, or text as mythological. These readings are then contextualized by an introduction which reflects on the 'how' of these engaging responses and an "essay at the back of the book" which replaces Myth Today with a reflection on the contemporary provenance of both Barthes and his most famous book. Thus the book is at least two things at once whichever way you look: a 'new' Mythologies and a book about Barthes' legacy, an exploration of the place of theory in critical writing, and a book about contemporary culture.

My Grandfather's Gallery Dec 25 2020 A singular man in the history of modern art, betrayed by Vichy, is the subject of this riveting family memoir On September 20, 1940, one of the most famous European art dealers disembarked in New York, one of hundreds of Jewish refugees fleeing Vichy France. Leaving behind his beloved Paris gallery, Paul Rosenberg had managed to save his family, but his paintings—modern masterpieces by Cézanne, Monet, Sisley, and others—were not so fortunate. As he fled, dozens of works were seized by Nazi forces and the art dealer's own legacy was eradicated. More than half a century later, Anne Sinclair uncovered a box filled with letters. "Curious in spite of myself," she writes, "I plunged into these archives, in search of the story of my family. To find out who my mother's father really was . . . a man hailed as a pioneer in the world of modern art, who then became a pariah in his own country during the Second World War. I was overcome with a desire to fit together the pieces of this French story of art and war." Drawing on her grandfather's intimate correspondence with Picasso, Matisse, Braque, and others, Sinclair takes us on a personal journey through the life of a legendary member of the Parisian art scene in My Grandfather's Gallery. Rosenberg's story is emblematic of millions of Jews, rich and poor, whose lives were indelibly altered by World War II. Sinclair's journey to reclaim her family history paints a picture of modern art on both sides of the Atlantic between the 1920s and 1950s that reframes twentieth-century art history.

Advances in Ergonomics in Design Oct 03 2021 This book provides readers with a timely snapshot of ergonomics research and methods applied to the design, development and evaluation, of products, systems and services. It gathers theoretical

contributions, case studies and reports on technical interventions focusing on a better understanding of human machine interaction, and user experience for improving product design. The book covers a wide range of established and emerging topics in user-centered design, relating to design for special populations, design education, workplace assessment and design, anthropometry, ergonomics of buildings and urban design, sustainable design, as well as visual ergonomics and interdisciplinary research and practices, among others. Based on the AHFE 2021 International Conference on Ergonomics in Design, held virtually on 25–29 July, 2021, from USA, the book offers a thought-provoking guide for both researchers and practitioners in human-centered design and related fields.

L'économie du star-system Feb 24 2021 Les stars ont envahi tous les domaines de la culture, du cinéma à la peinture, de la musique au livre et au spectacle vivant. Pourquoi le succès semble-t-il de moins en moins s'expliquer par le talent ? Sur les marchés culturels de plus en plus mondialisés, où les " produits " déclinent de plus en plus des réussites récentes, où les structures de production se concentrent pour amortir les coûts de la " fabrication " des stars, quel espace reste-t-il pour la création véritable et l'innovation ? Nos engouements sont-ils condamnés à se tourner fatalement vers des « succès annoncés » à grands coups de campagnes promotionnelles ? En matière de politique culturelle, la défense de « l'exception française » suffit-elle pour pallier un phénomène devenu à ce point familier qu'on le pense inévitable : la généralisation tous azimuts du star-system ?
