Competing Visions Jul 14 2022 With a strong social emphasis and succinct narrative, **COMPETING VISIONS: A HISTORY OF CALIFORNIA, 2E** chronicles the stories of people who have had an impact on the state's history while presenting California as a hub of competing economic, social, and political visions. It highlights the state's cultural diversity and explicitly compares it to other Western states, the nation, and the world--illustrating the national and international significance of California's history. Its chronological organization and thematic approach enables readers to keep track of events and fully understand their significance. Telling the full story, the text concludes by discussing such current events as immigration and demographic changes, the Occupy Movement, energy challenges, and more.

101 Projects for Your Porsche Boxster Dec 07 2021 Since its introduction in 1997, the Porsche Boxster has earned a reputation as one of the world's

greatest sports cars, as well as a huge, loyal following of devoted drivers. This book is aimed at those owners of Boxsters who want to improve their machines while avoiding thousands of dollars in mechanic's costs. Clearly and simply written, with straightforward illustrations, this manual offers 101 projects to help you modify, maintain, and enhance your Porsche. Focusing on the 986 and 987 Boxster models, *101 Projects for Your Porsche Boxster* presents all the necessary information, associated costs, and pitfalls to avoid when performing a wide array of projects. In a word, it makes owning a Porsche Boxster an unqualified thrill.

*Iwo Jima and the Bonin Islands in U.S.-Japan Relations* Oct 13 2019 Like my two other books about security and territorial issues in the U.S.-Japan relationship, *The Origins of the Bilateral Okinawa Problem: Okinawa in U.S.-Japan Relations, 1945-19523* and *The Return of the Amami Islands: The Reversion Movement and U.S.-Japan Relations*, 4 this is first and foremost a study on the "intra-alliance" dynamics in which one country, the United States, continued to occupy and administer islands that were recognized as Japanese territory but, for a number of reasons, the United States and its wartime allies felt necessary to continue to administer. The longer this control continued, the more unnecessary it was seen by increasingly larger segments of the public and government of both countries due to the political erosion of the relationship caused by this friction. The question for policy makers and political leaders was finding the balance between security concerns, reversion demands, and national sentiment (in both countries), particularly as it related to the memory and sacrifices at Iwo Jima, in an effort to maintain friendly and cooperative relations. Eventually, the U.S. government agreed to Japanese requests to return the islands and this was done on 26 June 1968, a full four years prior to the even more problematic, but strategically important, Okinawa.

***The Greening of Petroleum Operations* Aug 23 2020** The Future of Petroleum Operations This state-of-the-art text analyzes some of the most contentious issues in the energy industry, covering new and greener processes for engineers and scientists and urging them to move petroleum operations closer to sustainability. Although petroleum is still the world's most diverse, efficient, and abundant energy source, there is a growing initiative from global political and industry leaders to "go green," because of climate concerns and high gasoline prices. This book investigates and details how to do that. This groundbreaking new volume: Explains why current petroleum industry practices are inherently unsustainable and offers unique new solutions for "greening" the petroleum industry Discusses hot-button issues, such as global warming, carbon sequestration, zero-waste management, and sustainability Shows engineers and scientists how to implement the processes necessary to be more environmentally conscious Offers, for the first time, a new theory that certain carbons do not contribute to global warming, but their origin and the processes involved do Praise for *The Greening of Petroleum Operations* "The book proposes a paradigm shift in energy management. It correctly identifies root causes of environmental impact of current petroleum production operations. With proper science, the book shows that fossil fuel production and utilization are inherently sustainable as long as natural materials and energy sources are used.... This book has the potential of revolutionizing energy management practices." —Farouq Ali, Honorary Professor of Oil and Gas Engineering, University of Calgary

***The Writing Public* Nov 06 2021** Inspired by the reading and writing habits of citizens leading up to the French Revolution, *The Writing Public* is a compelling addition to the long-running debate about the link between the Enlightenment and the political struggle that followed. Elizabeth Andrews Bond scoured France's local newspapers spanning the two decades prior to the Revolution as well as its first three years, shining a light on the

letters to the editor. A form of early social media, these letters constituted a lively and ongoing conversation among readers. Bond takes us beyond the glamorous salons of the intelligentsia into the everyday worlds of the craftsmen, clergy, farmers, and women who composed these letters. As a result, we get a fascinating glimpse into who participated in public discourse, what they most wanted to discuss, and how they shaped a climate of opinion. The *Writing Public* offers a novel examination of how French citizens used the information press to form norms of civic discourse and shape the experience of revolution. The result is a nuanced analysis of knowledge production during the Enlightenment. Thanks to generous funding from Michigan State University and its participation in TOME (Toward an Open Monograph Ecosystem), the ebook editions of this book are available as Open Access (OA) volumes, available on the Cornell University Press website and other Open Access repositories.

**David Vizard's How to Port and Flow Test Cylinder Heads Oct 05 2021**

**Porting heads is an art and science. It takes a craftsman's touch to shape the surfaces of the head for the optimal flow characteristics and the best performance. Porting demands the right tools, skills, and application of knowledge. Few other engine builders have the same level of knowledge and skill porting engine heads as David Vizard. All the aspects of porting stock as well as aftermarket heads in aluminum and cast-iron constructions are covered. Vizard goes into great depth and detail on porting aftermarket heads. Starting with the basic techniques up to more advanced techniques, you are shown how to port iron and aluminum heads as well as benefits of hand and CNC porting. You are also shown how to build a high-quality flow bench at home so you can test your work and obtain professional results. Vizard shows how to optimize flow paths through the heads, past the valves, and into the combustion chamber. The book covers blending the bowls, a basic porting procedure, and also covers pocket porting, porting the intake runners, and many advanced procedures. These advanced procedures include unshrouding valves, porting a shortside turn from the floor of the port down toward the valve seat, and developing the ideal port area and angle. All of these changes combine to produce optimal flow velocity through the engine for maximum power.**

**Communicating Science Jun 13 2022 Modern science communication has emerged in the twentieth century as a field of study, a body of practice and a profession—and it is a practice with deep historical roots. We have seen the birth of interactive science centres, the first university actions in teaching and conducting research, and a sharp growth in employment of science communicators. This collection charts the emergence of modern science communication across the world. This is the first volume to map investment around the globe in science centres, university courses and research, publications and conferences as well as tell the national stories of science communication. How did it all begin? How has development varied from one country to another? What motivated governments, institutions and people to see science communication as an answer to questions of the social place of science? Communicating Science describes the pathways followed by 39 different countries. All continents and many cultures are represented. For some countries, this is the first time that their science communication story has been told.**

**Murder at the Sleepy Lagoon Mar 30 2021** The notorious 1942 "Sleepy Lagoon" murder trial in Los Angeles concluded with the conviction of seventeen young Mexican American men for the alleged gang slaying of fellow youth Jose Diaz. Just five months later, the so-called Zoot Suit Riot erupted, as white soldiers in the city attacked minority youths and burned their distinctive zoot suits. Eduardo Obregon Pagan here provides the first comprehensive social history of both the trial and the riot and argues that they resulted from a volatile mix of racial and social tensions that had long been simmering. In reconstructing the lives of the murder victim and those accused of the crime, Pagan contends that neither the convictions (which were based on little hard evidence) nor the ensuing riot arose simply from anti-Mexican sentiment. He demonstrates instead that a variety of pre-existing stresses, including demographic pressures, anxiety about nascent youth culture, and the war effort all contributed to the social tension and the eruption of violence. Moreover, he recovers a multidimensional picture of Los Angeles during World War II that incorporates the complex intersections of music, fashion, violence, race relations, and neighborhood activism. Drawing upon overlooked evidence, Pagan concludes by reconstructing the murder scene and proposes a compelling theory about what really happened the night of the murder.
