Sudden unexplained infant death (SUID) is the sudden and unexpected death of an infant due to natural or unnatural causes. Sudden infant death syndrome (SIDS) is one of several causes of SUID. However, SIDS, unlike the other SUID causes, is a diagnosis that is reached when all other causes have been eliminated. Although most conditions or diseases usually are diagnosed by the presence of specific symptoms, SIDS is a diagnosis that should be given only after all other possible causes of sudden, unexplained death have been ruled out through a careful case investigation, which includes a thorough examination of the death scene, a complete autopsy, and a review of the infant's medical history. Suffocation, drowning, electrocution, hyperthermia, hypothermia, carbon monoxide poisoning, and homicide are examples of other causes of SUID that can be explained after a careful case investigation. A thorough death scene investigation, as described in this book, is often the only way to make a distinction between SIDS and suffocation as a cause of death. Having knowledge about the many causes of SUID, in addition to SIDS, is critically important for the death scene investigator. At the scene, the investigator will gather evidence as well as information from the parents or caregivers who were with the infant and who may be in a great deal of distress. All of this information is crucial for distinguishing between a natural death, an accidental death, or a homicide. The Detective's Guide: Sudden Unexplained Infant Death Syndrome presents a comprehensive resource manual for law enforcement investigators tasked with the challenging and difficult investigation of infant deaths. This book provides comprehensive reference manuals for an investigator including: Infant Growth Charts Infant Developmental Milestones Information Gathering Templates Witness Interview Questions Water Temperature and Scalding Chart Infant Medical History Template Pregnancy History Questionnaire Feeding History Template Incident Scene Investigation Checklist Evidence/Materials Collection Log Prepare for these critical incidents today by purchasing the Detective's Guide: Sudden Unexplained Infant Death Investigations. The third edition of The Business Response to Misconduct Allegations is a step-by-step guide for what to do—and what not to do—in performing an investigation into claims of employee policy violations. This revised edition has been expanded to include background information for audit, facilities and building management, human resources, IT security, and other non-security business functions. Sections of this book address the decision whether to investigate, the naming of investigators, investigation planning, interview techniques and issues, the importance of taking notes and written statements, investigations in union settings, and much more. Also included are a series of checklists and templates to aid the investigative team before, during, and after an investigation. This playbook is an excellent risk management resource for audit professionals, human resources managers, site or facility managers, small business owners, or anyone who may be the first to receive reports of wrongdoing, regulatory violations, or prohibited workforce behavior.
