The Next Generation of Solution Focused Practice Dec 18 2019

The Next Generation of Solution Focused Practice shows how practitioners help create change by 'stretching the world' of their clients. The book brings new ideas from enactive cognition which show how skilled attention on the client and their words is important both practically and conceptually. It provides both a summary of the development of Solution Focused Brief Therapy (SFBT) over time and how the latest developments form a newly coherent form of practice based on developing descriptions. The author has structured the book using simple and easy to understand metaphors to paint a rich, creative, and visual picture of therapy for the reader, which makes it an accessible read. This book will be of interest to a wide range of SF practitioners internationally, as well as to those involved in coaching, counselling, family therapy, education, social work, healthcare and organisational change.

A Survey of the Principles and Practice of Wave Guides Oct 28

2020 Originally published in 1947, this book was written to provide an introductory survey of the developments in electromagnetic waves. Although the propagation of electromagnetic waves in metal tubes - wave-guides - had been studied for over fifty years prior to the publication of this book, the subject was primarily of theoretical interest. The treatment in this book reflects the movement away from the theoretical to a more practical interest in waves during the war, with the development of the first micro-wave radar equipment in 1940-1. The first six chapters are based on courses on microwave techniques, which were given during the war at the Radar School of the Telecommunications Research Establishment, whilst chapter seven is a mathematical treatment of the subject. This book will be of great value to scholars of the history of physics and electromagnetics.

EBOOK: Theory And Practice In Human Services Jun 16 2022 This is a revised edition of Theory and Practice in Health and Social Welfare which was well received on its first publication: "Throughout the book the writing is stimulating and thought provoking. The author repeatedly demonstrates a good capacity for synthesizing and summarizing in an accessible manner a range of material which is drawn from many sources ... encourages the critical questioning that is vitally necessary for those practitioners, educators and trainers who struggle with the elusive and demanding topic of linking theory and practice as a significant part of their working lives." - British Journal of Social Work "...a substantial contribution to the demystification of theoretical and practical issues surrounding health and social welfare" - Nursing Times Relating theory to practice is a long-standing concern in the human services. The first edition of this book helped readers appreciate the complexities of many of the key issues surrounding the integration of theory and practice. This revised and updated edition builds on that success, covering the latest developments in the relationship between theory and practice. The altered title reflects the widened focus of the book which now considers not just social work

and social care, nursing and healthcare, but also areas such as probation and community justice, youth and community work, counselling, advocacy and advice work. Theory and Practice in Human Services argues a case for making theory relevant to practice and ensuring that practice is informed by theory in an open, non-dogmatic way. The book is critical of approaches to theory which create a mystique and barriers to understanding. Equally, approaches to practice which neglect the underpinning knowledge base and values are presented as fundamentally flawed and dangerous. The book offers an integrated approach to theory and practice geared towards improving practice, increasing job satisfaction and promoting an attitude of continuous learning and development. The new edition has been substantially re-worked to make it even more accessible to a wide readership. It now contains structural devices to aid learning, a glossary and self test questions. It will be invaluable to students and practitioners in social work, nursing and other human services.

Solution Focused Practice Around the World Apr 02 2021 Solution Focused Practice Around the World provides an exploration of the diverse uses of SF and offers fascinating insights into how the Solution Focused approach is currently used in many applications around the globe. Bringing together prominent authors, practitioners and trainers, the collection is divided into five sections: theory; therapeutic applications; working with children and adolescents; coaching and working with organisations. Originating from the first international conference on Solution Focused practice spanning all applications of the approach, the chapters provide a grounding in the theory and practice, and an exploration of the breadth and depth of Solution Focused therapy. All practitioners of the Solution Focused approach globally as well as those working in the wider fields of therapy, social work, education, coaching and human resources will benefit from this text and the applicability of the inherent theories to their area of expertise.

Statistical Rethinking Nov 21 2022 Statistical Rethinking: A Bayesian Course with Examples in R and Stan builds readers' knowledge of and confidence in statistical modeling. Reflecting the need for even minor programming in today's model-based statistics, the book pushes readers to perform step-by-step calculations that are usually automated. This unique computational approach ensures that readers understand enough of the details to make reasonable choices and interpretations in their own modeling work. The text presents generalized linear multilevel models from a Bayesian perspective, relying on a simple logical interpretation of Bayesian probability and maximum entropy. It covers from the basics of regression to multilevel models. The author also discusses measurement error, missing data, and Gaussian process models for spatial and network autocorrelation. By using complete R code examples throughout, this book provides a

practical foundation for performing statistical inference. Designed for both PhD students and seasoned professionals in the natural and social sciences, it prepares them for more advanced or specialized statistical modeling. Web Resource The book is accompanied by an R package (rethinking) that is available on the author's website and GitHub. The two core functions (map and map2stan) of this package allow a variety of statistical models to be constructed from standard model formulas.

Using case examples of life challenges at every stage of adulthood, including problematic behaviours, trauma, loss and end of life care, it provides stimulating activities and questions that will help professionals develop constructive conversations with service users and help them find the solutions they need. This comprehensive guide is an essential introduction for all those working with adults in health and social care. **ISE Database System Concepts** Mar 01 2021 Database System Concepts by Silberschatz, Korth and Sudarshan is now in its 7th edition and is one of the cornerstone texts of database education. It presents the fundamental concepts of database management in an intuitive manner geared toward allowing students to begin working with databases as quickly as possible. The text is designed for a first course in databases at the junior/senior undergraduate level or the first year graduate level. It also contains additional material that can be used as supplements or as introductory material for an advanced course. Because the authors present concepts as intuitive descriptions, a familiarity with basic data structures, computer organization, and a high-level programming language are the only prerequisites.

Important theoretical results are covered, but formal proofs are omitted. In place of proofs, figures and examples are used to suggest why a result is true.

Solution Focused Practice in End-of-Life and Grief Counseling May 03 2021 "Although I have been a hospice nurse for almost 19 years, I am not a counselor. However, I will be able to use some of the information I learned here to assist my patients and my colleagues with issues encountered during the difficult time when patients are dying and families are struggling with realities. I will definitely share this book with our bereavement counselors and social workers." Score: 90, 4 stars --Doody's "[T]his is a book about possibilities-not finalities...about all the different ways that people deal with loss and bereavement and how solution focused brief therapy can be helpful in

making sense of the experience that people go through when facing death." --Harry Korman, MD Solution focused practice challenges the conventional approach to bereavement counseling by emphasizing solution building over simple problem-solving. Joel Simon, with over 16 years of experience in the field, demonstrates how this therapy can help clients think of possibilities, rather than limitations, when facing death or the loss of a loved one. This book presents a general overview of solution focused practice, tools, and methodologies for practitioners. Simon also provides real-life vignettes and verbatim transcripts from actual patients in end-of-life or bereavement counseling. This book provides insight into the philosophy and practice of solution focused therapy, as applied to clients with life-limiting conditions and their loved ones. Key topics discussed: The use of language in solution focused practice: theory, meaning making, and the role of emotions Tools of solution-building, with questions, troubleshooting guidelines, and tips for evaluating outcomes The distinction between problem-solving and solution-building Co-constructing goals with clients Applying solution focused principles to hospice, grief, and bereavement practice This resource serves as an invaluable tool for social workers, hospice workers, psychologists, and other bereavement and grief-counseling professionals.
