A history of capitalism in nineteenth- and twentieth-century China and India exploring the competition between their tea industriesTea remains the world's most popular commercial drink today, and at the turn of the twentieth century, it represented the largest export industry of both China and colonial India. In analyzing the global competition between Chinese and Indian tea, Andrew B. Liu challenges past economic histories premised on the technical "divergence" between the West and the Rest, arguing instead that seemingly traditional technologies and practices were central to modern capital accumulation across Asia. He shows how competitive pressures compelled Chinese merchants to adopt abstract, industrial conceptions of time, while colonial planters in India pushed for labor indenture laws to support factory-style tea plantations. Further, characterizations of China and India as premodern backwaters, he explains, were themselves the historical result of new notions of political economy adopted by Chinese and Indian nationalists, who discovered that these abstract ideas corresponded to concrete social changes in their local surroundings. Together, these stories point toward a more flexible and globally oriented conceptualization of the history of capitalism in China and India. Is revolution possible in the age of the Anthropocene? Marx has returned, but which Marx? Recent biographies have proclaimed him to be an emphatically nineteenth-century figure, but in this book, Mike Davis's first directly about Marx and Marxism, a thinker comes to light who speaks to the present as much as the past. In a series of searching, propulsive essays, Davis, the bestselling author of City of Quartz and recipient of a MacArthur Fellowship, explores Marx's inquiries into two key questions of our time: Who can lead a revolutionary transformation of society? And what is the cause—and solution—of the planetary environmental crisis? Davis consults a vast archive of labor history to illuminate new aspects of Marx's theoretical texts and political journalism. He offers a "lost Marx," whose analyses of historical agency, nationalism, and the "middle landscape" of class struggle are crucial to the renewal of revolutionary thought in our darkening age. Davis presents a critique of the current fetishism of the "anthropocene," which suppresses the links between the global employment crisis and capitalism's failure to ensure human survival in a more extreme climate. In a finale, Old Gods, New Enigmas looks backward to the great forgotten debates on alternative socialist urbanism (1880–1934) to find the conceptual keys to a universal high quality of life in a sustainable environment. The acclaimed New York Times series on social class in America—and its implications for the way we live our lives We Americans have long thought of ourselves as unburdened by class distinctions. We have no hereditary aristocracy or landed gentry, and even the poorest among us feel that they can become rich through education, hard work, or sheer gumption. And yet social class remains a powerful force in American life. In Class Matters, a team of New York Times reporters explores the ways in which class—defined as a combination of income, education, wealth, and occupation—influences destiny in a society that likes to think of itself as a land of opportunity. We meet individuals in Kentucky and Chicago who have used education to lift themselves out of poverty and others in Virginia and Washington whose lack of education holds them back. We meet an upper-middle-class family in Georgia who moves to a different town every few years, and the newly rich in Nantucket whose mega-mansions have driven out the longstanding residents. And we see how class disparities manifest themselves at the doctor's office and at the marriage altar. For anyone concerned about the future of the American dream, Class Matters is truly essential reading. "Class Matters is a beautifully reported, deeply disturbing, portrait of a society bent out of shape by harsh inequalities. Read it and see how you fit into the problem or—better yet—the solution!"—Barbara Ehrenreich, author of Nickel and Dimed and Bait and Switch
