## **The Institution of International**

**Order** Jul 25 2020

This volume delivers a history of internationalism at the League of Nations and the United Nations (UN), with a focus on the period from the 1920s to the 1970s, when the nation-state ascended to global hegemony as a political formation.

Combining global, regional and local scales of analysis, the essays presented here provide an interpretation of the two institutions — and their complex interrelationship — that is planetary in scale but also pioneeringly multi-local. Our central argument is that although the

League and the UN shaped internationalism from the centre, they were themselves moulded just as powerfully by internationalisms that welled up globally, far beyond Geneva and New York City. The contributions are organised into three broad thematic sections,

the first focused on the production of norms, the second on the development of expertise and the third on the global re-ordering of empire. By showing how the ruptures and continuities between the two international organisations have shaped the content and format of what we now refer to as 'global governance', the collection determinedly sets the Cold War and the emergence of the Third World into a single analytical frame alongside the crisis of empire after World War One and the geopolitics of the Great Depression. Each of these essays reveals how the League of Nations and the United

Nations provided a global platform for formalising and proliferating political ideas and how the two institutions generated new spectrums of negotiation and dissidence and re-codified norms. As an ensemble, the book shows how the League of Nations and the United Nations constructed and progressively re-fashioned the basic building blocks of international society right across the twentieth century. Developing the new international history's view of the League and UN as dynamic, complex forces, the book demonstrates that both organisations should be

understood to have played an active role, not just in mediating a world of empires and then one of nation-states, but in forging the many principles and tenets by which international society is structured. *Critical Reflections on Transnational Organized Crime, Money Laundering and Corruption* Dec 30 2020 Contributors offer a wide range of challenges to commonly-held views on transnational crime and approaches to fighting it, suggesting that current international policies follow an American model that exaggerates its threat out of

proportion.  
The Threat of Transnational Organised Crime to International Security (re)assessed Jun 16 2022  
*Organisation of the Secretariat and of the International Labour Office* May 23 2020  
International Regulatory Co-operation Dec 10 2021 Borders are becoming increasingly porous, with growing flows of goods, services, people and capital. Governments, more than ever, need to co-ordinate their efforts to develop global standards to address climate change, as well as crises related to finance, health, environment and migration; secure peace; and ensure

sustainable economic prosperity and social inclusion. International organisations play a key role in fostering multilateral action and addressing the fragmentation that may undermine effective domestic action. To shed greater light on international standard setting, this unique report collects, compares and assesses the practices of 50 international organisations on their governance arrangements, operational modalities, use of quality management disciplines and co-operation efforts. It analyses different types of organisations - inter-governmental,

supra-national, trans-governmental and private - and identifies avenues for making their action more effective, inclusive and relevant. [Resumen de editor]  
**International Law and Transnational Organised Crime** Jan 23 2023 Since the end of the Cold War, states have become increasingly engaged in the suppression of transnational organised crime. The existence of the UN Convention against Transnational Organised Crime and its Protocols demonstrates the necessity to comprehend this subject in a systematic way. Synthesizing the

various sources of law that form this area of growing academic and practical importance, *International Law and Transnational Organised Crime* provides readers with a thorough understanding of the key concepts and legal instruments in international law governing transnational organised crime. The volume analyses transnational organised crime in consideration of the most relevant subareas of international law, such as international human rights and the law of armed conflict. Written by internationally recognized scholars

in international and criminal law as well as respected high-level practitioners, this book is a useful tool for lawyers, public agents, and academics seeking straightforward and comprehensive access to a complex and significant topic.

**The Fight Against International Organised Crime: Theory and Practice**

Jun 04 2021

*Quarterly Bulletin of Information on the Work of International Organisations* Jan 11 2022

Organizing Democracy Sep 26 2020 In the past twenty-five years, a number of countries have made the transition to democracy. The support of

international organizations is essential to success on this difficult path. Yet, despite extensive research into the relationship between democratic transitions and membership in international organizations, the mechanisms underlying the relationship remain unclear. With *Organizing Democracy*, Paul Poast and Johannes Urpelainen argue that leaders of transitional democracies often have to draw on the support of international organizations to provide the public goods and expertise needed to consolidate democratic rule.

Looking at the Baltic states' accession to NATO, Poast and Urpelainen provide a compelling and statistically rigorous account of the sorts of support transitional democracies draw from international institutions. They also show that, in many cases, the leaders of new democracies must actually create new international organizations to better serve their needs, since they may not qualify for help from existing ones.

Transnational Organised Crime in International Law  
May 15 2022 There is extensive and detailed academic literature on the legal development of international

crimes such as war crimes and crime against humanity. However, not much attention has been paid to other serious crimes, including narcotics-related offences, human trafficking and money laundering, which do not necessarily amount to international crimes in the traditional sense. The purpose of this monograph is to fill this gap and offer a critical analysis of developments in the field of transnational organised crime under international law. The book is divided into two parts. Part I is entitled "Norms, Principles, and Concepts." It traces the history of organised crime

and explores key concepts and norms relating to the practice from a multi-disciplinary perspective. It then looks at legal obligations imposed upon States as well as non-State actors in relation to transnational organised crime. Part II illustrates how these norms, principles and obligations are translated and enforced in practice. This will be done through case studies at the level of national law (Thailand, Serbia and the UK), regional law (European Union) and international law (United Nations). "A book of many parts, its thematic coherence comes from its devotion to

identifying the social threat posed by organised crime and the legal steps taken at the international and national levels against that threat. Rich with example and illustration and written in a light, direct, style, it will provide a lucid guide for practitioners, policy-makers and students to the largely untraversed territory of the international legal system set up to suppress transnational organised crime." Professor Neil Bolster, University of Canterbury, New Zealand. "...the international law governing organized crime is a close relative of the body of law applicable to the

International Criminal Court and similar institutions. It provides a forum to address issues of more general concern, such as the scope of universal jurisdiction, immunities, statutory limitation and extradition. Tom Obokata's study, with its original and in some ways unique perspective, enriches our knowledge of the field". Professor William Schabas, Irish Centre for Human Rights. "The book is well written, its documentation is quite exhaustive, and its thesis is timely and compelling." Professor M. Cherif Bassiouni, DePaul University College

of Law. Measuring Organised Crime in Europe Aug 06 2021 Recent years have been characterised by growing awareness among European member states about serious shortcomings to the way organised crime is measured and assessed. Currently, organised crime reports primarily generate descriptive analyses of a past situation based on law enforcement data and do not always provide the necessary information for proactive and preventive policy strategies. Therefore an EU Action Plan has been issued to develop a more

future oriented and risk based methodology for the measurement of organised crime and to convert the traditional organised crime situation reports into strategic reports for planning purposes. This book is the outcome of two studies undertaken by a team composed of Belgian, Italian and Swedish researchers for the European Commission. It presents an overview of current practices in the measurement of organised crime in Europe and includes a discussion about the concept and the assessment of the impact of the phenomenon. Further the

feasibility of the implementation of the existing EU Action Plan was studied and evaluated. As a result of applied research Measuring Organised Crime in Europe provides an in depth and comparative analysis of current practice in drafting organised crime reports across and by the EU and offers new ideas to improve their quality.

### **Dutch Organised Agriculture in International Politics**

### **Organised Crime and Law**

Apr 21 2020 Organised Crime and Law Enforcement: A Network Perspective examines organised

crime and law enforcement through the conceptual lens of networks. The book takes stock of the many ways in which network theories and concepts, including social network analysis, can apply to studying both organised crime and law enforcement responses to organised crime. It is the first attempt to bring these diverse network perspectives and distinct fields of research together. The book is organised into two parts. The first part uses network perspectives to advance our understanding of the interconnected social structure of organised criminal

groups, to expose their strengths and vulnerabilities, and to illuminate factors that enable such groups to undertake complex criminal activities. The second part uses a network lens to examine the challenges that organised criminal groups present for a wide range of law enforcement agencies, and the utility of network theories and concepts in understanding and informing their responses to organised crime. Written in a clear and direct style, the book will appeal to scholars and practitioners of criminology, sociology, law enforcement, and all those interested in learning more

about theories of organised crime and its relationship with law enforcement. *The New Terrorism* Feb 18 2020 In light of asymmetrical security threats in western democracies as well as in conflict regions, this timely book examines the actors, strategies and tactics of Islamist terrorism and transnational organized crime around the globe. The authors develop an interdisciplinary approach to understanding the ideologies, forms of cooperation, and technological means used in new forms of terrorism. The book starts with an empirical analysis of the new

Jihadism as a global Islamist theology and strategy. Furthermore, it investigates the interaction, cooperation and fusion of transnational organized crime and Islamist terrorism and highlights new communication technologies as vital tools for terrorism. Lastly, the book provides an analysis of asymmetrical strategies and tactics used by terrorist organisations, and of low-level terrorism. As such, it will appeal to all political scientists and criminologists studying terrorism, as well as to professionals at various national and international

security services.  
Transnational Organised Crime in International Law  
Dec 22 2022 There is extensive and detailed academic literature on the legal development of international crimes such as war crimes and crime against humanity. However, not much attention has been paid to other serious crimes, including narcotics-related offences, human trafficking and money laundering, which do not necessarily amount to international crimes in the traditional sense. The purpose of this monograph is to fill this gap and offer a critical analysis of developments in the field of transnational

organised crime under international law. The book is divided into two parts. Part I is entitled 'Norms, Principles, and Concepts.' It traces the history of organised crime and explores key concepts and norms relating to the practice from a multi-disciplinary perspective. 'A book of many parts, its thematic coherence comes from its devotion to identifying the social threat posed by organised crime and the legal steps taken at the international and national levels against that threat. Rich with example and illustration and written in a light, direct, style, it will provide a lucid guide for practitioners, policy-makers and students to the largely untraversed territory of the international legal system set up to suppress transnational organised crime.'

Professor Neil Bolster, University of Canterbury, New Zealand. '... the international law governing organized crime is a close relative of the body of law applicable to the International Criminal Court and similar institutions. It provides a forum to address issues of more general concern, such as the scope of universal jurisdiction, immunities, statutory limitation and extradition. Tom Obokata's study, with its original and in some ways unique perspective, enriches our knowledge of the field'. Professor William Schabas, Irish Centre for Human Rights. 'The

book is well written, its documentation is quite exhaustive, and its thesis is timely and compelling.' Professor M. Cherif Bassiouni, DePaul University College of Law. [The Disruption of Organised Crime](#) Feb 24 2023 Analyzing the structures of transnational organized crime, this book considers whether traditional mechanisms and national jurisdictions can tackle this increasing menace. Highlighting the strengths and weaknesses in the present methods of control, the book discusses the possibilities of developing more

effective national and international strategies, the creation of non-legal mechanisms outside the traditional criminal justice system and the implications of 'disruption strategies'. The roles of law enforcement officers, tax investigators, financial intelligence officers, compliance officers, lawyers and accountants - in enforcing both civil and criminal sanctions on organized crime - are also considered. **International Regulatory Co-operation The Role of International Organisations in Fostering Better Rules of Globalisation** Mar

13 2022 This unique report considers the governance arrangements, operational modalities, use of quality management disciplines and co-operation efforts of 50 international organisations. It analyses different types of organisations and identifies avenues for more effective, inclusive actions.

**Review of International Co-operation** Oct 28 2020

**The New Faces of Victimhood** Mar 21 2020 In this book, experts reflect on the legal challenges posed by the darker sides of globalization, from cyber crime to human trafficking. They examine the

limits of domestic systems of justice in providing protection, empowerment and redress to the victims.

*From Mafia to Organised Crime* Nov 28 2020 This book presents primary research conducted in Italy, USA, Australia and the UK on countering strategies and institutional perceptions of Italian mafias and local organized crime groups. Through interviews and interpretation of original documents, this study firstly demonstrates the interaction between institutional understanding of the criminal threats and historical events that have

shaped these perceptions. Secondly, it combines analysis of policies and criminal law provisions to identify how policing models which combat mafia and organised crime activities are organized and constructed in each country within a comparative perspective. After presenting the similarities between the four differing policing models, Sergi pushes the comparison further by identifying both conceptual and procedural convergences and divergences across both the four models and within international frameworks. By looking at topics as varied as mafia

mobility, money laundering, drug networks and gang violence, this book ultimately seeks to reconsider the conceptualizations of both mafia and organized crime from a socio-behavioural and cultural perspective.

**Allocating International Responsibility Between Member States and International Organisations** Mar 01 2021 The ever-growing interaction between member States and international organisations results, all too often, in situations of non-conformity with international law (eg peacekeeping operations, international

economic adjustment programmes, counter-terrorism sanctions). Seven years after the finalisation of the International Law Commission's Articles on the Responsibility of International Organisations (ARIO), international law on the allocation of international responsibility between these actors still remains unsettled. The confusion around the nature and normative calibre of the relevant rules, the paucity of relevant international practice supporting them and the lack of a clear and principled framework for their elaboration impairs

their application and restricts their ability to act as effective regulatory formulas. This study aims to offer doctrinal clarity in this area of law and purports to serve as a point of reference for all those with a vested interest in the topic. For the first time since the publication of the ARIO, all international responsibility issues dealing with interactions between member States and international organisations are put together in one book under a common approach. Structured around a systematisation of the interactions between these actors, the study provides an analytical

framework for the regulation of indirect responsibility scenarios. Based on the ideas of the intellectual fathers of international law, such as Scelle's 'dédoulement fonctionnel' theory and Ago's 'derivative responsibility' model, the book employs old ideas to add original argumentation to a topic that has been dealt with extensively by recent commentators.

*Hidden Power* Jul  
05 2021 What  
should we make of  
the outsized role  
organized crime

plays in conflict and crisis, from drug wars in Mexico to human smuggling in North Africa, from the struggle in Crimea to scandals in Kabul? How can we deal with the convergence of politics and crime in so-called 'mafia states' such as Guinea-Bissau, North Korea or, as some argue, Russia? Drawing on unpublished government documents and mafia memoirs, James Cockayne discovers the strategic logic of organized crime, hidden in a century of forgotten political--criminal collaboration in New York, Sicily and the Caribbean. He reveals states and mafias competing - and

collaborating -- in a competition for governmental power. He discovers mafias influencing elections, changing constitutions, organizing domestic insurgencies and transnational terrorism, negotiating peace deals, and forming governmental joint ventures with ruling groups. And he sees mafias working with the US government to spy on American citizens, catch Nazis, try to assassinate Fidel Castro, invade and govern Sicily, and playing unappreciated roles in the Bay of Pigs fiasco and the Cuban Missile Crisis.

*Handbook of  
International*

*Organisations (associations, Bureaux, Committees, Etc.)*  
Apr 02 2021  
International Institutions Sep 19 2022  
Although transnational actors are not new on the world stage the number and type of these international entities expanded dramatically after World War II. This set examines both the rise of these new transnational actors and their effect on international politics and policies.  
The International Responsibility of International Organisations Feb 12 2022  
The International Responsibility of International Organisations addresses the joint

responsibility of organisations for violations of international law committed during the deployment of peacekeeping operations. More specifically, it inquires if and under which circumstances - in terms of the notion of control - international organisations can be jointly responsible. The author analyses the practice of international organisations (the United Nations, NATO, the European Union, the African Union and the Economic Community of West African States) on an inter-institutional level, as well as in the field in the form of five case studies.

The likelihood and distribution of responsibility between international organisations engaged in peacekeeping operations is affected by the different layers of applicable primary norms (Security Council mandates, internal law of the organisations, international humanitarian and human rights law). Although external pressure may contribute to enhancing the effectiveness of holding international organisations jointly responsible, any substantial measures and mechanisms can only be implemented with the participation of

states and international organisations.

### **Organizing the 20th-Century World**

Jan 31 2021

International

Organizations play a pivotal role on the modern global stage and have done, this book argues, since the beginning of the 20th century. This volume offers the first historical exploration into the formative years of international public administrations, covering the birth of the League of Nations and the emergence of the second generation that still shape international politics today such as the UN, NATO and OECD.

Centring on Europe, where the multilateralization of

international relations played out more intensely in the mid-20th century than in other parts of the world, it demonstrates a broad range of historiographical and methodological approaches to institutions in international history. The book argues that after several 'turns' (cultural, linguistic, material, transnational), international history is now better equipped to restate its core questions of policy and power with a view to their institutional dimensions. Making use of new approaches in the field, this book develops an understanding of

the specific powers and roles of IO-administrations by delving into their institutional make-up.

### **Pandemics: Insurance and Social Protection**

Nov 09 2021 This open access book collects expert contributions on actuarial modelling and related topics, from machine learning to legal aspects, and reflects on possible insurance designs during an epidemic/pandemic. Starting by considering the impulse given by COVID-19 to the insurance industry and to actuarial research, the text covers compartment models, mortality changes during a pandemic, risk-

sharing in the presence of low probability events, group testing, compositional data analysis for detecting data inconsistencies, behaviouristic aspects in fighting a pandemic, and insurers' legal problems, amongst others. Concluding with an essay by a practicing actuary on the applicability of the methods proposed, this interdisciplinary book is aimed at actuaries as well as readers with a background in mathematics, economics, statistics, finance, epidemiology, or sociology.

**The Politics of International Organizations** Aug 18 2022  
International

organisations (IOs) often receive a bad press, seen as intrusive, domineering and unresponsive to the needs of the people and countries they are meant to serve. The best way to understand the operation of these international organisations is to bring together those who represent their countries at IOs and those who have been working at IOs at various capacities and then to listen to their experiences. This book develops an alternative approach to the analysis of IOs that takes account of all those involved, whether state representatives, IO leaders and members of the

secretariat. Experts with long experience in the WTO, the World Bank, the IMF, WIPO, the FAO and the WHO at senior level consider the workings of the IOs, and a conclusion that explicitly draws out the comparative lessons and contrasts the insights of practitioners from those of external observers. This book takes an alternative approach to the analysis of IOs that takes account of all those involved, whether state representatives, IO leaders and members of the secretariat. Providing a well-informed, innovative and consistently structured analysis

of IOs this work will be of interest to students and scholars of international relations, international organizations and global governance.

**Organised Crime and the Challenge to Democracy**

May 03 2021 This innovative book investigates the paradoxical situation whereby organized crime groups, authoritarian in nature and anti-democratic in practice, perform at their best in democratic countries. It uses examples from the United States, Japan, Russia, South America, France, Italy and the European Union.

The Disruption of

International Organised Crime

Oct 20 2022 Analyzing the structures of transnational organized crime, this book considers whether traditional mechanisms and national jurisdictions can tackle this increasing menace. Highlighting the strengths and weaknesses in the present methods of control, the book discusses the possibilities of developing more effective national and international strategies, the creation of non-legal mechanisms outside the traditional criminal justice system and the implications of 'disruption strategies'. The roles of law

enforcement officers, tax investigators, financial intelligence officers, compliance officers, lawyers and accountants - in enforcing both civil and criminal sanctions on organized crime - are also considered.

**Measuring Organised Crime in Belgium**

Sep 07 2021 The analysis of organised crime is of interest to academics, policymakers, and regulators. The approach taken is necessarily determined by the requirement for analysis and the available resources. This book is the outcome of a six-month research undertaken for the Belgian Gendarmerie, at

Ghent University. It presents a methodology to measure the impact of organised crime in Belgium and its research design has been shaped primarily by the demands of applied research. In doing so the research draws extensively from a breadth of research into organised crime while being shaped by the intelligence and policy requirements of the Gendarmerie's Organised Crime unit. This is reflected in the use of a risk-management process that provides the iterative framework for the methodology. Central to this is a three-fold focus that incorporates

organised crime groups, illicit markets and economic sectors. Each element relies upon a different method of analysis, however their complementarity is ensured through the organising principle of the spectrum of enterprise. The result is a methodology that is capable of being incorporated into existing systems and provides a richer form of strategic assessments regarding the impact of organised crime in Belgium. **Understanding International Sport Organisations** Aug 26 2020 The governance of international sport is dominated by the

SINGOs (sporting international non-governmental organisations). The IOC, FIFA, IAAF and the FIA wield global influence, but how exactly do such complex organisations operate? This important book examines the rise of the SINGOs, their structures, organisational behaviour and their power in the context of modern sport and international politics. Written by two world-leading experts, the book sheds new light on the relationship between these SINGOs and the sports which they govern. It provides a close critical analysis of the policies and practices of the

most important international sport organisations, from their historical origins to the present day. Using case studies of key events such as the Olympics and the recent FIFA scandals, it examines the central question of how best to understand the significance of these organisations today. Combining historical insight with original research, *Understanding International Sport Organisations: Principles, Power and Possibilities* is essential reading for anyone with an interest in the politics of sport, the sociology of sport, sport administration, sport business or

sport management.

### **The Organized Crime Community**

Oct 08 2021 This book contains a collection of essays in honor of Alan A. Block including his now classic study on the origins of IRAN-CONTRA. It brings together important contributions from Block's students and contemporaries to show the impact of his work on the field of global organized crime. Professor Alan A. Block of Penn State University has proven to be one of the most inspiring criminologists in the field.

[Organized Crime: Culture, Markets and Policies](#) Apr 14 2022 Dina Siegel and Hans Nelen The term 'global organized crime'

has been in use in criminology since the mid 1990s.

Even more general and abstract than its daughter-terms (transnational or cross-border organized crime), 'global organized crime' seems to embrace the activities of criminal groups and networks all around the planet, leaving no geographical space untouched. The term appears to cover the geographical as well as the historical domain: 'global' has taken on the meaning of 'forever and ever'. Global organized crime is also associatively linked with 'globalisation'. The social construction of both terms in scientific discourse is in itself

an interesting theme. But perhaps even more interesting, especially for academics trying to conduct empirical research in this area, is the analysis of the symbolic and practical meaning of these concepts. How should criminologists study globalisation in general and global organized crime in particular? Which instruments and 'theoretical luggage' do they have in order to conduct this kind of research? The aim of this book is not to formulate simple, straightforward answers to these questions, but rather to give an overview of contemporary criminological research combining

international, national and local dimensions of specific organized crime problems. The term global organized crime will hardly be used in this respect. In other social sciences, such as anthropology, there is a tendency to get rid of vague and abstract terms which can only serve to confuse our understanding. In our opinion, criminology should follow this initiative. *The Law of International Organisations* Nov 16 2019 This new edition considers the legal concepts that have emerged from a wider political debate to govern vastly differing inter-governmental

organisations ranging from the UN to the EU **Illegal Markets and the Economics of Organized Crime** Oct 16 2019 This book showcases recent advances in the theoretical and empirical understanding of the economic aspects of organised crime and illegal markets. It provides new insights into defining and quantifying the influence of organised crime by drawing on innovative approaches to studying criminal networks and organisations such as the Hells Angels. The book includes analysis of the structure of illegal drug markets from

international leaders in the field. Finally the text includes empirical case studies of the diverse markets where organised crime is currently active including the illegal market for crystal methamphetamine in Australia, tiger products in China and the falcon and fur trades in Russia. This book was based on a special issue of Global Crime.

Quarterly Bulletin of Information on the Work of International Organisations Nov 21 2022 The quarterly bulletin contains information concerning Congresses held since Apr. 1922.  
**Transnational Organized Crime**

Jul 17 2022  
Transnational organized crime interferes with the everyday lives of more and more people - and represents a serious threat to democracy. By now, organized crime has become an inherent feature of economic globalization, and the fine line between the legal and illegal operation of business networks is blurred. Additionally, few experts could claim to have comprehensive knowledge and understanding of the laws and regulations governing the international flow of trade, and hence of the borderline towards criminal

transactions. This book offers contributions from 12 countries around the world authored by 25 experts from a wide range of academic disciplines, representatives from civil society organizations and private industry, journalists, as well as activists. Recognizing the complexity of the issue, this publication provides a cross cultural and multi-disciplinary analysis of transnational organized crime including a historical approach from different regional and cultural contexts.  
**Social Dimensions of Organised Crime**  
Dec 18 2019 This book presents a

multi-disciplinary investigation into extortion rackets with a particular focus on the structures of criminal organisations and their collapse, societal processes in which extortion rackets thrive and fail and the impacts of bottom-up and top-down ways of fighting extortion racketeering. Through integrating a range of disciplines and methods the book provides an extensive case study of empirically based computational social science. It is based on a wealth of qualitative data regarding multiple extortion rackets, such as the Sicilian Mafia, an international money

laundering organisation and a predatory extortion case in Germany. Computational methods are used for data analysis, to help in operationalising data for use in agent-based models and to explore structures and dynamics of extortion racketeering through simulations. In addition to textual data sources, stakeholders and experts are extensively involved, providing narratives for analysis and qualitative validation of models. The book presents a systematic application of computational social science

methods to the substantive area of extortion racketeering. The reader will gain a deep understanding of extortion rackets, in particular their entrenchment in society and processes supporting and undermining extortion rackets. Also covered are computational social science methods, in particular computationally assisted text analysis and agent-based modelling, and the integration of empirical, theoretical and computational social science.
