The World Championship Grand Prix (WCGP) is the premier championship event of motorcycle road racing. The WCGP was established in 1949 by the sport's governing body, the Fédération Internationale de Motocyclisme (FIM), and is the oldest world championship event in the motorsports arena. This book, developed especially for racing enthusiasts by motorsports engineering expert Dr. Alberto Boretti, provides a broad view of WCGP motorcycle racing and vehicles, but is primarily focused on the design of four-stroke engines for the MotoGP class. The book opens with general background on MotoGP governing bodies and a history of the event's classes since the competition began in 1949. It then presents some of the key engines that have been developed and used for the competition through the years. Technologies that are used in today's MotoGP engines are discussed. A sidebar discussion on calculating brake, indicated, and friction performance parameters provides mathematical information for readers who like such technical details. Future developments of MotoGP engines, including the use of biofuels and recovery of thermal and braking energy, are presented. The introduction concludes with a chart that details the winners of the various classes of WCGP motorcycle racing since the competition began in 1949. The bulk of the book consists of four previously published SAE technical papers that were

expressly chosen by Dr. Boretti to provide greater insight to the relationships between engine parameters and performance, namely the influence on friction and mean effective pressure of traditional spark ignited four stroke engines tuned for a narrow high power output. The first paper provides the reader with a quick way to estimate the friction loss and engine output. The second paper discusses output and fuel consumption of multi-valve motorcycle engines. The third paper, published in 2002, compares WCGP engines developed to comply with the then-new FIM regulations that allowed four-stroke engines in the competition. The fourth paper examines specific power densities and therefore the level of sophistication and costs of MotoGP 800 cm³ engines. This paper shows the performance of these as well as the 1000cc SuperBike engines. The fifth paper presents four engine concepts including one for a MotoGP/Superbike with 2 and 3 cylinders. The sixth paper compares 3 and 4 in-line, V4, V5, and V6 layouts through 1-D engine simulations. The seventh paper considers the actual operation of 800cc MotoGP engines on the race track, where the percentage of the duration in fully open throttle is less than 20% of the race, but the partial throttle is used for as much as 80% of the race. The final paper in the compendium reports on the Honda oval piston engine concept.

On cover: OTS 1 The explosive growth of the Japanese electronics industry continues to be driven by a combination of market forces and the unique characteristics of the Japanese social organization and people. As an industrial phenomenon, the Japanese electronics industry receives considerable attention from researchers in various fields. However, most of their studies focus on either historical

analyses intent on discovering the secret of the industry's enormous success, or on the issue of America's competitiveness in the face of challenges from Japanese technology. Moreover, none of these studies can be free of the bias that stems from each researcher's own upbringing and environment. The authors of *The Japanese Electronics Industry* have pooled their diverse experience and talents to create a balanced, objective study of this complex subject. They illuminate the history and characteristics of the industry, show the current state of the industry, and explore the research, development, and education vital to the future of the industry. This beautiful book is the foremost account of the history of Honda. The result of \$3,200 and a dream in 1948, The Honda Motor Company has become synonymous with innovation and quality and leads the world in motorcycle technology. With every passing year and each new model, the Honda name becomes even more prestigious in the motorcycling world. The world of Honda and motorcycle enthusiasts both crave a comprehensive look at these bikes and the company that produces them and this outstanding chronicle offers a truly remarkable perspective of more than fifty years of Honda's prowess. This book is the fifth in the Mick Walker Racing Motorcycle series. It covers the Grand Prix Motorcycles from Japan. Vols. for 1956- include a separately paged section: Directory of organizations, associations and institutions. Hurricane! The Bob Hannah Story is the first book to explore the life of American motocross and Supercross racing's first superstar. From the time he raced the Husquvarna he bought with "ones, fives, tens, change; all of my savings," until his retirement at Unadilla in 1989, Bob Hannah won races and championships, spoke his mind, and signed almost every autograph-seeker's program. Told as an oral history by Hannah himself and by those who know him best, this book is full of stories that could only have happened to a character as colorful as the Hurricane. The tale author Tom Madigan tells is the life of an American original, a boy who went

from riding dirt bikes in the desert with his father to taking the motocross world by surprise. By the time Hannah retired in 1989, he had collected 70 AMA National wins, seven AMA National titles, a MX des Nations title, and legions of devoted fans. When inducted into the AMA Motorcycle Hall of Fame in 1999, he was second to none in both total and consecutive wins. Richly illustrated, this is the definitive biography of the Hurricane. Vol. for 1947-76 indexes: Car and driver, Motor trend, and Road & track; 1977-81 indexes 15 American automotive journals. This report sets out the Resolutions and Reports approved by the Council of Ministers of Transport during the year 1964. In 2011, former Canadian national champion motocross racer Brent (Airmail) Worrall, who had recently returned to the sport after a lengthy absence due to struggles with alcohol, gambling, and depression, was again in a fight to save his own life. His shot at redemption and making peace with the sport he loves was cut short by a near-fatal crash. A mechanical malfunction in mid-flight over the track's largest jump sent him spiralling into a nose dive. He had just enough time while airborne to say, "Survive, survive, survive." He broke his back and neck in six places, fractured his clavicle, sternum, and multiple ribs and collapsed his lungs. After flat-lining on the operating table four times, Brent's doctors finally managed to stabilize him. He required two blood transfusions, and his doctors feared the worst. He emerged from hospital a paraplegic, given only five to ten years to live due to various complications from his accident. After losing the sport he loved many years before to the seedy underworld of depression, alcoholism, drugs, and compulsive gambling, he vowed never to let go of his lifeline passion again. Brent

meticulously takes us through his troubled journey to the eventual promised land where he now sits. Along the way, he recounts his many inspirational interactions with those who helped mould his character, including Rick Hansen on his Man in Motion tour as well as looking into Terry Fox's eyes on his Marathon of Hope. In keeping with his character as an avid sports and history enthusiast, Brent takes us back through many pertinent historical events that shaped his life and society as a whole. Two years after his accident, Brent was back at the track, this time to announce races rather than participate in them. Shortly after that, he launched the Canadian Moto Show, a live online talk-radio show, as well as a magazine, with his good friend Kevin Lefebvre. Throughout the process of giving back to the motocross community while also reinventing himself, he maintained a position as a senior writer at Motocross Performance Magazine. In 2016, he was nominated for a Coast Mental Health Courage to Come Back award. He continues to reshape his life within the sport he loves, refusing to let any of the formidable obstacles he has faced slow him down. This book is Brent's firsthand account of his journey, written in all five senses, with the hope that his story will motivate and inspire others to see that any seemingly insurmountable obstacles can be overcome.
